SUSPENDED TOPS

rovere thermo

I top scatolati sono realizzati con multistrato di betulla finlandese ad incollaggio fenolico con impiallacciatura in essenza di legno come da nostro campionario.

Boxy tops are made of Finnish Birch plywood with phenolic adhesives veneered in wood essence as per our samples.

Top with double integrated sinks completely in Corian 125 mm thick with drain prepared for siphon.

SLOT

_2002

design
Nevio Tellatin

Ha cambiato il modo di concepire il lavabo, ha ridefinito l'archetipo di un suo componente meramente funzionale trasformandolo in strumento compositivo del progetto, ha sancito l'inizio di un nuovo percorso, quello del minimalismo assoluto. Pulito, essenziale, rigoroso, moderno. In una sola parola Slot. Il Corian come materiale d'elezione con il suo uniforme candore e la setosa superficie da toccare, il disegno come regola da seguire. Forme nette, linee squadrate, spigoli vivi e ampiezza dei bordi ma soprattutto totale assenza della piletta, del troppopieno, di tutto ciò che in qualche modo può offuscare la perfetta estetica dell'oggetto. Rimane una fessura, un taglio nella parte posteriore del bacino, un'apertura sottile che corre lungo tutto lo sviluppo del lavabo e accoglie l'acqua grazie all'impercettibile inclinazione del fondo, nascondendo alla vista il sifone integrato. Le parti tecniche sono invisibili, l'acqua defluisce lungo una scanalatura lineare, l'immagine del lavabo rimane pulita, assoluta, essenziale.

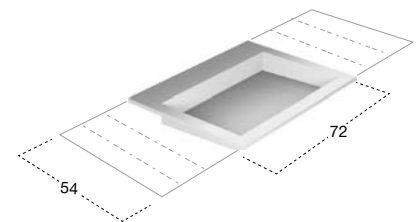

A different way of conceiving a sink redefining the archetype of its purely functional component of the project, transforming it into a compositional tool, marks the beginning of a new path, that of absolute minimalism.

Clean, essential, rigorous, modern. In one word Slot. Corian as a material of choice with its uniform whiteness and silky surface to touch, such as the design rule to follow. Net shapes, square lines, sharp edges and width of the borders but total absence of drain, overflow, of all that can somehow confuse the perfect aesthetics of the object. It remains a slit, a cut in the rear part of the basin, a thin opening that runs along the whole development of the basin and accommodates the water through the imperceptible inclination of the bottom, hiding the integrated siphon. The technical parts are invisible, water flows along a linear slot, the sink image remains clean, absolute, essential.
