Agape Elements

Agape Elements is Agape's general product catalogue. It is a neatly organized taxonomy of everything made by us. It encompasses 127 products ordered alphabetically and divided in typologies within 11 categories engaging all the senses and covering every functional need of a bathroom environment.

We firmly believe that making architecture is about establishing relationships. Often born from specific architectural needs, the products in this catalogue are capable of establishing an intense dialogue not only between them but also with the spaces that embrace them. In **Agape Elements** we have highlighted and brought to the surface many of the invisible connections that link the elements making our range so uniquely powerful. Within the rigid constraints of an old-school paper publication, we have done everything to make this rather extensive vocabulary easy to navigate: illustrations, schemes, diagrams and technical details are all there to help you find the right product for your projects.

We are in fact architects at heart and Agape is, above all things, about the project. Since day one, we worked with architects and designers to design objects to be part of an architecture. As if they had been designed by the same, invisible hand, the elements in our catalogue are easy to combine both aesthetically and geometrically. They defy the zeitgeist and passing trends to offer long lasting solutions thanks to the quality of our materials and to the adherence to good design principles that will never go out of fashion.

Agape Elements is a carefully curated vocabulary. Much more than the sum of its parts, it is your fundamental tool to help you designing complete, one-stop solutions for what still remains the most intimate part of the contemporary domestic landscape: the bathroom.

Agape Elements

Agape Elements è il catalogo generale dei prodotti Agape. È una tassonomia sapientemente organizzata di tutto ciò che produciamo. Comprende 127 prodotti ordinati alfabeticamente e divisi in tipologie in 11 categorie che coinvolgono tutti i sensi e coprono ogni esigenza funzionale dell'ambiente bagno.

Crediamo fermamente che fare architettura è stabilire relazioni. Spesso nati da esigenze progettuali specifiche, i prodotti nel nostro catalogo sono capaci di stabilire un dialogo intenso tra di loro e con lo spazio che li accoglie. In **Agape Elements**, abbiamo evidenziato e portato in superficie molte delle relazioni che collegano i nostri elementi rendendo la nostra gamma così unica. Rimanendo entro i limiti rigidi di una pubblicazione cartacea, abbiamo fatto di tutto per rendere questo vasto vocabolario facile da navigare: illustrazioni, schemi, diagrammi e dettagli tecnici sono lì per aiutarvi a trovare il prodotto giusto per i vostri progetti.

Siamo infatti architetti nel cuore e Agape, prima di tutto, è progetto. Dal primo giorno abbiamo lavorato con architetti e designer per disegnare oggetti affinché diventino parte di un'architettura. Come se fossero stati progettati dalla stessa, invisibile mano, gli elementi nel nostro catalogo sono facili da combinare sia esteticamente che per la loro geometria. I nostri prodotti sfuggono lo spirito del tempo e le mode passeggero, per offrire soluzioni che durano nel tempo grazie alla qualità dei materiali e alla loro aderenza a principi di buon design che non passeranno mai di moda.

Agape Elements è un vocabolario attentamente curato dell'architettura del bagno. Molto più della somma delle sue parti, esso è lo strumento fondamentale per aiutarvi a disegnare soluzioni complete, one-stop per quello che rimane ancora oggi la parte più intima del paesaggio domestico contemporaneo.

Washbasins / Lavabi

So many different shapes to meet practical needs and give an individual look to the entire bathroom. A variety of materials for getting back in touch with nature each day or experiencing new sensations. All this with maximum assurance of quality and durability: guaranteed by Agape's experience.

Tante forme diverse per soddisfare le esigenze pratiche e caratterizzare esteticamente l'intera stanza da bagno. Una varietà di materiali per ritrovare un quotidiano contatto con la natura, oppure per sperimentare nuove sensazioni. Tutto questo con la massima sicurezza di qualità e durata: garantisce l'esperienza Agape.

design Benedini Associati, 2011

**815**

Wall mounted washbasin / Lavabo a parete

The 815 project is the fruit of the search for a dialectical relationship between the washbasin and the forms of the Plus units. The asymmetrical shape of the washbasin offers handy surface space and was designed empirically by imagining the natural erosion caused by the impact of water dripping onto marble. In its standard version made from Cristalplant® biobased white or white Carrara marble; on request available in other stones or marbles.

Il progetto 815 nasce dalla ricerca di un rapporto dialettico tra il lavabo e i volumi dei mobili Plus. La forma asimmetrica del lavabo definisce un comodo piano d'appoggio ed è ricavata in maniera empirica immaginando l'erosione naturale provocata dall'impatto delle gocce d'acqua sul marmo. Disponibile in Cristalplant® biobased bianco, in marmo bianco di Carrara o con altre pietre o marmi a richiesta.

Bjhon 1

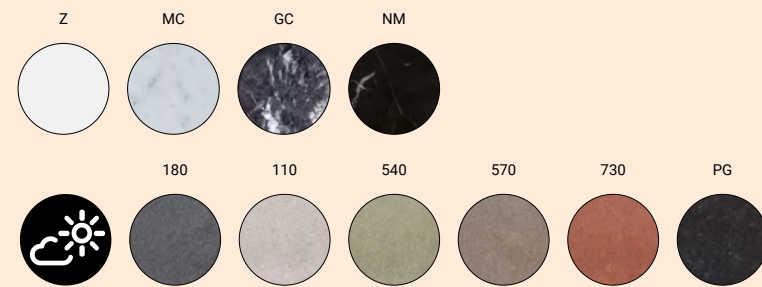

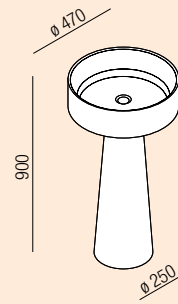

Column washbasin / Lavabo a colonna

A. Mangiarotti

Bjhon washbasins were born from an idea of Angelo Mangiarotti in 1970. Originally conceived as a pot, Bjhon 1 freestanding is made of marble or with a technologically advanced material: Cristalplant® biobased; also available in the versions in Petit Granit marble or in Cementoskin® (colored cement paste) for outdoor use. Available with floor or wall drain version.

I lavabi Bjhon nascono da un'idea di Angelo Mangiarotti nel 1970. Originariamente concepito come fioriera, Bjhon 1 freestanding è realizzato in marmo o con un materiale tecnologicamente avanzato: il Cristalplant® biobased; disponibile anche nelle versioni in marmo Petit Granit o in Cementoskin® (cemento colorato in pasta) per utilizzo Outdoor. Disponibile con versione per scarico a pavimento o a muro.

Carrara

Wall mounted washbasin / Lavabo a parete

From white Carrara marble, an eternal material of art and architecture, comes this washbasin with a large basin and thin edges, supported by a stainless steel structure. Together with the other elements of the Agape collection, the Carrara washbasin contributes to the creation of an elegant and rigorous environment, in which to surround yourself with simple and refined shapes. Available not only in white Carrara marble but also in grey Carnic, black Marquina, Verde Alpi or dark Emperador. The version in Petit Granit fits with elegance and rigor in outdoor environments.

Dal marmo bianco di Carrara, eterno materiale d'arte e architettura, nasce questo lavabo dall'ampio bacino e dai bordi sottili, sostenuto da una struttura in acciaio inox. Insieme agli altri elementi della collezione Agape, il lavabo Carrara contribuisce a determinare un ambiente elegante e rigoroso, nel quale circondarsi di forme semplici e raffinate. Disponibile, oltre che in marmo bianco di Carrara anche in grigio Carnico, nero Marquina, verde Alpi o Emperador dark. La versione in Petit Granit si inserisce con eleganza e rigore negli ambienti esterni.

Cube

Wall mounted and over countertop washbasin / Lavabo a parete e da appoggio

Solid shape and natural warmth for Cube, a plywood washbasin realised in natural, brown or dark oak or in reconstituted wood, with teak finish. The large side surfaces show off the grain of the wood. Cube, available in the wall-mounted or over countertop version, can be integrated with other elements in oak or teak, playing with the lines, volumes and natural sensations, to create solutions with great warmth and appeal.

Volume massiccio e calore naturale per Cube, il lavabo in multistrato con finitura in rovere naturale, bruno, scuro o in legno precomposto con finitura teak. Le ampie superfici laterali fanno apprezzare le venature del legno. Cube, disponibile nella versione a parete o da appoggio su piano, può essere integrato con altri elementi in rovere o teak giocando con linee, volumi e sensazioni naturali, per dare vita a soluzioni ricche di fascino e calore.

DR

Integrated washbasin / Lavabo integrato nel piano

The DR washbasin top, designed by Studio MK27, Marcio Kogan and Mariana Ruzante, is distinguished by both its refinement and the quality of its details, characteristics that mark all the projects of this Brazilian architecture studio. The washbasin is framed on three sides by metal plates. The basin has a rectangular shape and is integrated into the marble top with its drain hidden by a slab made of the same material. It can be placed either in the centre, to the right or to the left. DR is available in lengths ranging from 120 to 220 cm and comes with one or more drawers placed under the top in the basin's free area for lengths exceeding 140 cm. The front of the drawers adopts the Lato system materials and finishes to respond to the most varied aesthetic needs.

Il piano-lavabo DR è contraddistinto dalla ricercatezza e qualità dei suoi dettagli, principi alla base dei progetti architettonici dello studio brasiliano. Il lavabo è incorniciato su tre lati da lastre di metallo. L'invase, integrato nel piano in marmo con lo scarico nascosto da una lastra dello stesso materiale, ha una forma rettangolare e può essere posizionato al centro, a destra o a sinistra. Disponibile con lunghezze che vanno dai 120 ai 220 cm, per le dimensioni superiori ai 140 cm, DR prevede uno o più cassetti sottopiano collocati nella zona libera dal catino. I frontali dei cassetti, riprendono i materiali e le finiture disponibili per il sistema Lato permettendo al lavabo di rispondere alle più diverse esigenze estetiche.

Drop

Column washbasin / Lavabo a colonna

The Drop washbasin reminds the design of the tub of the same name, in harmony with a dynamic and unconventional style in the bathroom. The column version allows wall mounting or island positioning. The choice of materials is wide and emotionally rich: from Cristalplant® biobased to white Carrara marble, grey Carnic, black Marquina, verde Alpi or Emperador dark marble. The washbasin can also be supplied in stone or marble at the customer's request. Available with floor or wall drain version.

Il lavabo Drop riprende il disegno dell'omonima vasca, in sintonia con uno stile dinamico e anticonvenzionale nell'ambiente bagno. La versione a colonna permette fissaggio a muro o posizionamento ad isola. Ampia e ricca di emozioni materiche la scelta dei materiali: dal Cristalplant® biobased ai marmi bianco di Carrara, grigio Carnico, nero Marquina, verde Alpi o Emperador dark. Il lavabo può essere fornito anche in pietre o marmi a richiesta del cliente. Disponibile con versione per scarico a pavimento o a muro.

EII

Integrated washbasin / Lavabo integrato nel piano

EII is a washbasin countertop program characterized by a light design and high configurability. EII is made in white Corian® (Glacier White) or in white Carrara, grey Carnic, black Marquina, Verde Alpi or Emperador dark marble. Upon request, and after technical evaluation, other colors of Corian® and types of marble are possible. The self-supporting version enhances the elegance of EII which appears suspended thanks to the support of simple brackets and a thickness reduced to only 38,5 mm. Available with a minimum length of 80 cm and a maximum of 260 cm, the basin recess is 60 cm wide. The basins can be freely positioned along the entire length of the top and come complete with gridded covers. This version of EII can also be completed with dedicated splash-back panels in the same materials.

EII è un programma di piani lavabo caratterizzato dal segno leggero e dalla elevata configurabilità. EII è realizzato in Corian® bianco (Glacier White) oppure in marmo bianco di Carrara, grigio Carnic, nero Marquina, verde Alpi o Emperador dark. Su richiesta, e dopo valutazione tecnica, sono possibili altre colorazioni di Corian® e tipi di marmi. La versione autoportante esalta l'eleganza di EII che appare sospeso grazie al sostegno di semplici staffe ed uno spessore ridotto a soli 38,5 mm. Disponibile con lunghezza minima di cm 80 e massima di cm 260, l'invaso del lavabo è largo cm 60. Gli invasi sono liberamente posizionabili su tutta la lunghezza del piano e sono completi di griglia. EII autoportante può essere completato da alzate dedicate in materiale coordinato.

Handwash

Wall mounted washbasin / Lavabo a parete

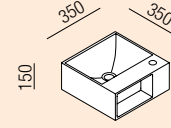

This compact, squareshaped hand basin in white Cristalplant® biobased is perfect for installation in any type of space, giving it a unique stylish look. Without side storage compartment, it can be combined with wall-mounted or single-hole tap fittings. The version in Cementskin® (coloured concrete in paste) allows also its outdoor use, even in small ambiances.

Compatto e squadrato, questo lavamani in Cristalplant® biobased bianco si presta ad essere inserito in qualsiasi spazio, caratterizzandolo con uno stile speciale. Con o senza vano portaoggetti laterale, può essere abbinato a rubinetteria a parete o monoforo. La versione in Cementskin® (cemento colorato in pasta) ne permette l'utilizzo anche in ambienti esterni, anche di piccole dimensioni.

Mach 2 – towel holder / porta salviette

Immersion

Column washbasin / Lavabo a colonna

The Immersion washbasin, with a matt black-coated floor-standing metallic support, is the ideal complement for the bathtub of the same name, inspired by the tradition of oriental timber bathing vessels.

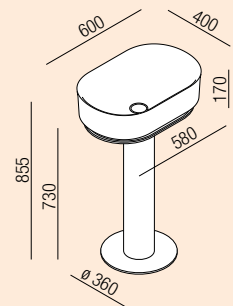

The compact size of this washbasin makes it suitable for confined living spaces as well. Made of Cristalplant® Biobased, all the versions are available in matt white or two-colour finish in dark or light grey.

The wall-mounted version is furnished with a rear slot for water connections. Available with floor or wall drain version.

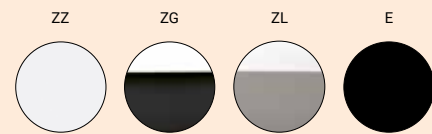

Il lavabo Immersion, con supporto metallico verniciato in nero opaco per appoggio a terra, diventa il complemento ideale dell'omonima vasca, ispirata alle tradizionali tinozze di legno orientali. Il suo ingombro ridotto lo rende adatto anche ad ambienti di piccole dimensioni. Realizzato in Cristalplant® biobased, tutte le versioni del lavabo sono disponibili in bianco opaco o bicolore grigio scuro o chiaro.

Il modello per l'utilizzo a parete è dotato di apertura posteriore per i collegamenti idrici. Disponibile con versione per scarico a pavimento o a muro.

Lariana

Column washbasin / Lavabo a colonna

The family of Lariana bathroom elements is characterized by a harmonious juxtaposition of geometric and fluid lines, which is also matched by the possibility of combining different materials: from Cristalplant® biobased, to marble in different shades, to wood. The washbasin Lariana column is composed of a soft basin that rests on a monolithic base; both can be made in Cristalplant® biobased or in marble in different finishes; column is also available in oak in the usual finishes or in lacquered wood with open pore. Lariana can be completed with a storage unit in natural, brown, dark oak or in pre-composed wood with teak finish and with a storage shelf in the same oak or iroko finishes, both the accessories can be in lacquered wood open pore finishes. Lariana can be combined with the containers of the Lato or Flat XL programs. Available with floor or wall drain version.

La famiglia degli elementi per il bagno Lariana è caratterizzata da un'armoniosa contrapposizione di linee geometriche e fluide, al quale fa riscontro anche la possibilità di abbinare diversi materiali: dal Cristalplant® biobased, al marmo in diverse tonalità, al legno. Il lavabo Lariana a colonna è composto da un morbido bacino che appoggia su un monolitico basamento; entrambi possono essere realizzati in Cristalplant® biobased o in marmo in diverse finiture; la colonna è disponibile anche in rovere nelle consuete finiture o con laccatura a poro aperto. Lariana può essere completato con un mobile contenitore in rovere naturale, bruno, scuro o in legno precomposto con finitura teak e da una mensola portaoggetti nelle stesse finiture rovere o in iroko, entrambi gli accessori possono essere laccati a poro aperto. Lariana può essere affiancato dai contenitori dei programmi Lato o Flat XL. Disponibile con versione per scarico a pavimento o a muro.

Lito

Column washbasin / Lavabo a colonna

A. Mangiarotti

United by the sculptural aspect of their shapes and by the elegance of the material - white Carrara marble - the Lito washbasins then take on distinctive characteristics.

Lito 1 is made entirely from the excavation of a block of marble: its inverted 'L' shape makes it possible to obtain two pieces from each block with a maximum reduction of the waste of material. It is only intended for wall mounting.

Lito 2 with its imposing and at the same graceful geometry transcends the mere functional characteristic for which it was designed. Column positioning.

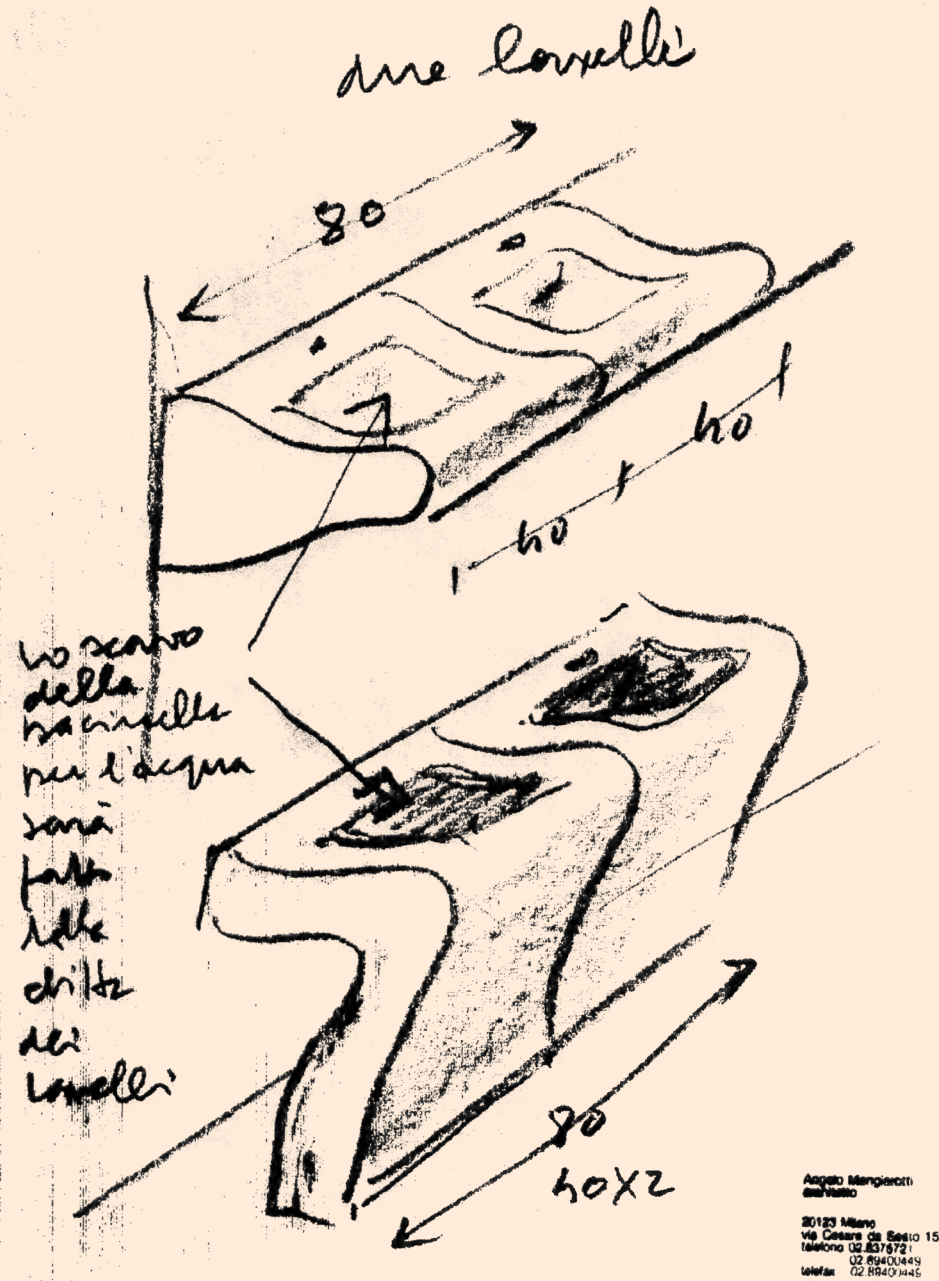

Lito 3, on the other hand, takes on more rigorous and still elegant lines, it only provides wall fixing. Lito washbasins can be made of stone or marble on request.

Accomunati dall'aspetto scultoreo delle loro forme e dall'eleganza del materiale - marmo bianco di Carrara - i lavabi Lito assumono poi caratteristiche distinte.

Lito 1 è realizzato interamente dall'escavazione di un blocco di marmo: la sua forma ad 'L' rovesciata permette di ricavare due pezzi da ogni blocco con una riduzione al massimo dello spreco di materiale. E' previsto solo per fissaggio a parete.

Lito 2 con la sua geometria imponente e allo stesso aggraziata trascende la mera caratteristica funzionale per cui è stato disegnato. Posizionamento a colonna.

Lito 3 assume invece linee più rigorose e pur sempre eleganti, prevede il solo fissaggio a parete. I lavabi Lito possono essere realizzati in pietre o marmi a richiesta.

Lito 1

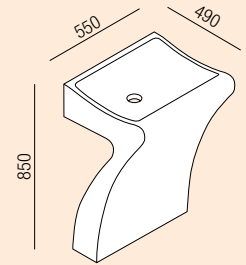

Column washbasin / Lavabo a colonna

A. Mangiarotti

Entirely carved from a single block of marble, Lito 1 takes the form of an upside down "L" with a particularly gently dished bowl. The personality of an internationally famous architect and designer transforms the bathroom into an avant-garde design. Made of white Carrara marble, the washbasin can be delivered also in stone or marble types on demand.

Realizzato interamente dall'escavazione di un blocco di marmo, Lito 1 è caratterizzato da una forma ad "L" rovesciata e da una conca particolarmente morbida. La personalità di un protagonista dell'architettura e del design mondiale, trasforma lo spazio bagno in un progetto all'avanguardia. Realizzato in marmo bianco di Carrara, il lavabo può essere fornito anche in pietre o marmi a richiesta del cliente.

ACER0731

design Angelo Mangiarotti, 2003

Lito 2

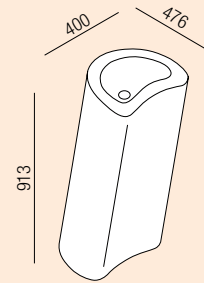

Column washbasin / Lavabo a colonna

A. Mangiarotti

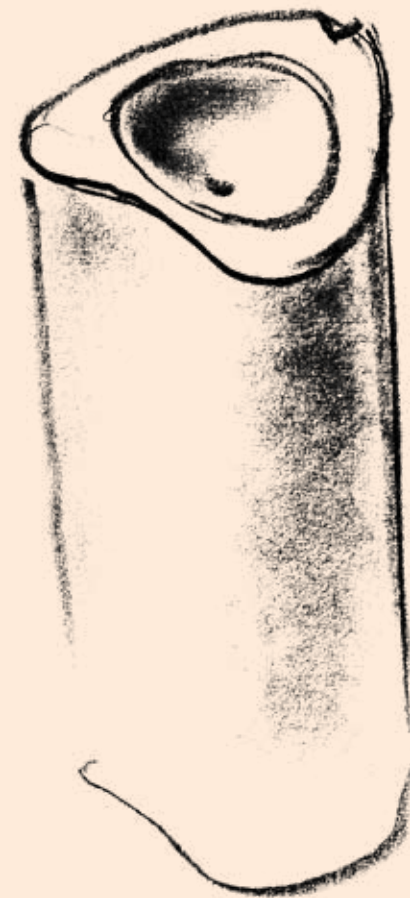

Realised in white Carrara marble, Angelo Mangiarotti's design takes the form of a hand basin designed with the skill of a true master. Lito 2 is far more than a simple furnishing accessory, without losing sight of functional characteristics it is intended to provide: with its ergonomic lines and ideal capacity of the basin. The washbasin can be delivered also in stone or marble types on demand.

Realizzato in marmo bianco di Carrara, il progetto di Angelo Mangiarotti prende la forma di un lavamani disegnato con la sapienza di un autentico maestro. Lito 2 va oltre la semplice dimensione di complemento d'arredo, senza trascendere le caratteristiche funzionali cui è destinato: nelle linee ergonomiche e nell'ideale capienza del bacino. Il lavabo può essere fornito anche in pietre o marmi a richiesta del cliente.

Litorale

Wall mounted washbasin / Lavabo a parete

Litorale is a washbasin countertop with an uninterrupted linear basin available in lengths ranging from 80 to 240 cm. Only 6 cm thick, Litorale is manufactured in thermoformed solid surface and it can be equipped with a number of trays available in three different sizes (20, 40 and 60 cm) made either in iroko or in the same material as the basin itself. For lengths above 160 cm, Litorale can be equipped with two faucets. In this case, to ensure proper flow management, the basin has to be equipped with the same number of wastes.

Litorale è un piano-lavabo a canale continuo disponibile in lunghezze su misura comprese tra gli 80 e i 240 cm. Realizzato in solid surface termoformato e spesso solo 6 cm, il lungo catino dai segni lineari minimi è accessorabile con una serie di piani di appoggio liberamente posizionabili. I piani sono a catalogo in tre diverse dimensioni (20, 40 e 60 cm), in legno iroko massello oppure nello stesso materiale del lavabo. Per lunghezze superiori ai 160 cm, il piano può essere dotato di due rubinetti. In questo caso, per assicurare il corretto deflusso delle acque, a ogni rubinetto deve corrispondere uno scarico dedicato. Il lavabo permette l'installazione della rubinetteria sia sul piano che a parete.

Litorale

Over countertop washbasin on Evo 21 / Lavabo in appoggio su Evo 21

The Litorale washbasin is also available in the over-container version in combination of the recently introduced Evo21 system.

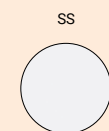

In this version the basin has to cover the whole length of the composition. The washbasin is only 6 cm tall and inherits its dimensional range (from 80 to 240 cm) from the self-bearing, wall-mounted version. The same goes for the possibility of adding trays in three different lengths (20, 40 and 60 cm) in two different materials (white solid surface and iroko wood). For further details please refer to the section dedicated to Evo21 in the Agape Systems catalog.

Il lavabo Litorale è disponibile anche nella versione da appoggio in combinazione con i contenitori del sistema Evo21 recentemente introdotto a catalogo.

Nella versione in appoggio su contenitori, il catino deve coprire l'intera lunghezza della composizione. L'altezza del lavabo è di soli 6 cm e la gamma delle lunghezze riprende quelle della versione autoportante a parete (da 80 a 240 cm) come pure la possibilità di inserire dei piani di appoggio di diverse dimensioni (20, 40 e 60 cm) in due diversi materiali (solid surface bianco o legno iroko massello). Per ulteriori approfondimenti rimandiamo alla sezione dedicata ad Evo21 del catalogo Agape Systems.

Petra

Family / Famiglia

The Petra family includes sink, tray and platform for shower and hose reel, all made of Cementoskin® with a natural and velvety surface available in different colors. The shower tray follows the shape of the washbasin of the same name, while the platform is made up of slats gathered by a stainless steel perimeter profile complete with anchors for fixing to the ground. The use of the column in combination with the washbasin or the shower tray offers various aesthetic advantages, such as the coverage of the connections, and functional, thanks to the wall taps that can be positioned directly on the column thus avoiding the need for holes and risks of breakage.

La famiglia Petra comprende lavabo, piatto e pedana per doccia ed avvolgitubo, tutti realizzati in Cementoskin® con superficie naturale e vellutata disponibile in diverse colorazioni. Il piatto doccia ricalca la sagoma del lavabo omonimo, mentre la pedana è composta da doghe raccolte da un profilo perimetrale in acciaio inox completo di ancoraggi per il fissaggio al suolo. L'utilizzo della colonna in abbinamento al lavabo o al piatto doccia offre diversi vantaggi sia estetici, come la copertura degli attacchi, che funzionali, grazie alla rubinetteria a parete che può essere posizionata direttamente sulla colonna evitando così la necessità di fori e rischi di rotture.

Over countertop washbasin / Lavabo da appoggio

The countertop version further enhances the functionality of the Petra washbasin: in addition to the new material - Cementoskin®, particularly resistant to dirt and with unique aesthetic characteristics - the countertop increases its practicality. Possibility of use both indoors and outdoors of various sizes, from large gardens to more intimate balconies.

La versione su piano esalta ancora di più la funzionalità del lavabo Petra: oltre al materiale inedito - Cementoskin®, particolarmente resistente allo sporco e con caratteristiche estetiche uniche - il piano di appoggio aumenta la sua praticità. Possibilità di utilizzo sia indoor che in ambienti esterni di varie dimensioni, dagli ampi giardini ai balconi più intimi.

Raso

Over countertop washbasin / Lavabo da appoggio

Almost twenty years from the release of its first version, the Raso washbasin debuts in the newfangled over-countertop version for every Agape container system. The new washbasin evolves its lines, details and dimensions while remaining faithful to the clean geometries that made the original version so iconic and versatile at the same time. Raso over-countertop is available in one size in thermoformed acrylic solid surface or in marble, in the following finishes: white Carrara, gray Carnic, black Marquina, green Alpi, Emperador dark and Petit Granit.

A quasi vent'anni dal lancio della prima versione, il lavabo Raso debutta nell'inedita versione da appoggio da collocare sui piani dei diversi programmi Agape. Il nuovo lavabo si raffina nelle sue linee e si aggiorna nei dettagli e nelle dimensioni in sintonia con il rigore geometrico che lo ha reso allo stesso tempo iconico e molto versatile nei suoi abbinamenti. La versione in appoggio è disponibile in una sola dimensione nelle versioni in solid surface termoformato a base acrilica oppure in marmo, in tutte le finiture Agape a catalogo: bianco di Carrara, grigio Carnico, nero Marquina, verde Alpi, Emperador dark e Petit Granit.

Raso

Evo 21 Integrated washbasin / Lavabo integrato nel piano Evo 21

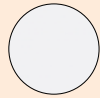

Together with the release of the new Evo 21 system, the Raso integrated washbasin, a long-seller in the Agape catalogue, also gets updated in its dimensions, details and materials. The new version remains faithful to the iconic geometries of Giampaolo Benedini's original design from 2003 and can be integrated in the new 12 mm Evo 21 solid surface countertops also in configurations with double basin.

In occasione del lancio del sistema Evo 21, il lavabo Raso integrato, long seller del catalogo Agape, si aggiorna nei materiali, nei dettagli e nelle dimensioni. La nuova versione rimane fedele al rigore iconico del progetto originale di Giampaolo Benedini del 2003 e può essere inserito sui piani Evo 21 in solid surface da 12 mm anche in configurazione con doppio lavabo.

Undici

Over countertop washbasins / Lavabi da appoggio

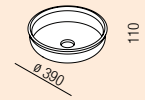

Undici washbasins, the name, italian for “eleven” comes from the characteristic that remains unchanged in the different versions: the height of 11 cm.

Made of white solid surface with thermoforming processing, they are available in three shapes: round, oval or rectangular; they can be placed on all Agape tops or under the Evo 21 tops of the same material, becoming integrated elements on the top itself.

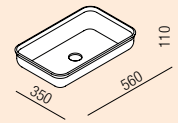

Lavabi Undici, il nome nasce dalla caratteristica che resta invariata nelle diverse versioni: l'altezza di cm 11.

Realizzati in solid surface bianco con lavorazione in termoformatura, sono disponibili in tre forme: tondo, ovale o rettangolare; possono essere posizionati in appoggio su tutti i piani Agape o incassati nei piani Evo 21 del medesimo materiale diventando elementi integrati al piano stesso.

Undici Inox

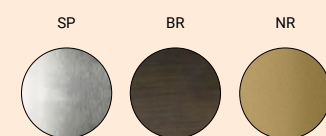

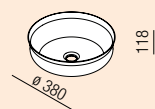

Over countertop washbasin / Lavabo da appoggio

The Undici Inox washbasin comes from the Undici family of the same name, it is made of AISI 304 steel (in brass for the brushed burnished and brushed natural brass finishes) by turning from 3 mm slabs. Its pure shape allows to maintain the same geometry for the countertop and recessed version (the recessed version is available only for Evo 21 marble tops of 20 mm). Three finishes available: brushed stainless steel, brushed natural brass and brushed burnished.

Il lavabo Undici Inox nasce dall'omonima famiglia Undici, viene realizzato in acciaio AISI 304 (in ottone per le finiture brunito spazzolato e ottone naturale spazzolato) per tornitura da lastre di mm 3.

La sua forma pura consente di mantenere la stessa geometria per la versione da appoggio e ad incasso (la versione ad incasso è disponibile solo per piani Evo 21 in marmo da 20 mm). Tre le finiture disponibili: inox spazzolato, ottone naturale spazzolato e brunito spazzolato.

Vieques

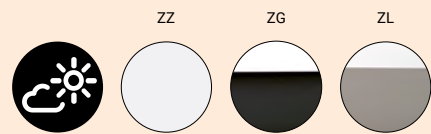

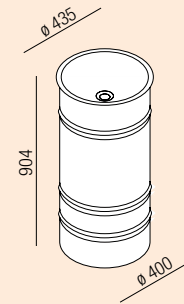

Column washbasin / Lavabo a colonna

The Vieques washbasins echo the style of the bathtub of the same name, a refined interpretation of bygone days conjuring up a stand-out element. The column freestanding version can also be placed in open spaces in direct exposure to atmospheric agents. Made of stainless steel and proposed in a completely white or two-tone version with dark grey or light grey exterior.

The washbasin has the possibility of applying a rectangular shelf in iroko wood to the edge, in order to offer a useful support surface. Available with floor or wall drain version.

I lavabi Vieques riprendono la matrice stilistica della vasca con il medesimo nome, raffinata interpretazione di archetipi della memoria, per dare vita a un elemento dalla forte personalità. La versione freestanding, dalla forma a colonna, può essere collocata anche in spazi aperti in esposizione diretta agli agenti atmosferici. Realizzata in acciaio inox e proposta con verniciatura completamente bianca oppure bicolore con esterno grigio scuro o grigio chiaro. Il lavabo ha la possibilità di applicare sul bordo una mensola rettangolare in legno di iroko, in modo da offrire un'utile superficie di appoggio. Disponibile con versione per scarico a pavimento o a muro.

Rimless sanitary ware

Rimless sanitary wares come without the internal rim or "frame" and represent the evolution of the traditional toilet combining design and functionality. Lower water consumption, ease of cleaning, silence and more compact dimensions are just some of the advantages of our new rimless bathroom fixtures, also revised in their aesthetics by the hands of their designers.

The flow of water plays a fundamental role in rimless sanitary wares: water comes out of a single hole and flows along the perimeter guided by the geometric shape of the basin itself to finally flow into the drain. The circular flow is designed to ensure immediate cleaning without leaving residues, avoiding the deposit of limescale and germs on the surface.

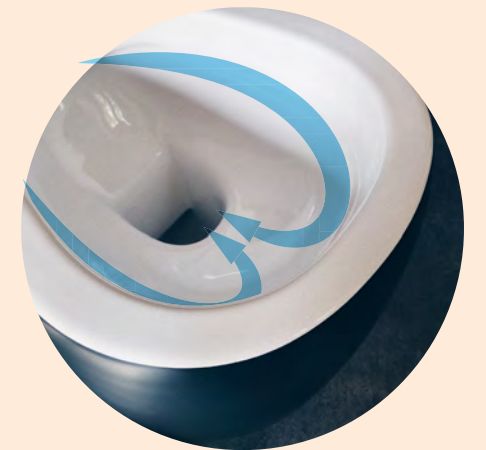

At the moment of writing the Agape catalogue includes three different rimless sanitary ware series: 750, Pear e Pear 2.

Sanitari rimless

I sanitari rimless, così chiamati perché senza brida, quindi senza la "cornice" interna, rappresentano l'evoluzione del vaso tradizionale e sono in grado di coniugare design e funzionalità. Minore consumo di acqua, facilità di pulizia, silenziosità e dimensioni più compatte sono solo alcune delle caratteristiche dei nostri nuovi sanitari rimless rivisti anche nell'estetica dalle matite sapienti dei loro designer.

Il flusso dell'acqua gioca un ruolo fondamentale nei sanitari rimless: fuoriesce da un unico foro e scorre lungo il perimetro guidata dalla conformazione geometrica dell'invaso stesso per confluire infine nello scarico. Il flusso circolare è progettato per assicurare una pulizia immediata senza lasciare residui, evitando il deposito di calcare e germi sulla superficie.

Attualmente il catalogo Agape comprende tre famiglie di sanitari rimless: 750, Pear e Pear 2.

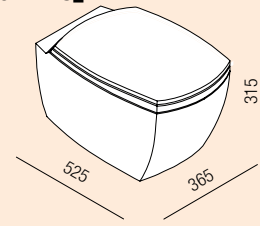

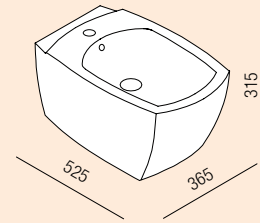

750

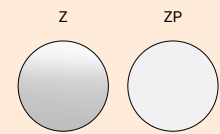

Wall mounted / Sospesi

Pure and simple ceramic shapes for furnishing the bathroom: this is the philosophy of the 750 sanitary ware collection, made in ceramic as wall-mounted version. Benedini Associati revisits 750 by interpreting the pure and essential shapes of the collection in more compact dimensions. Available in all glossy or matt white on the outside.

Pure ed essenziali forme in ceramica per arredare il bagno: questa è la filosofia della collezione di sanitari 750, realizzati in ceramica in versione sospesa. Benedini Associati rivisita 750 interpretando in forme più compatte le forme pure ed essenziali della collezione. Disponibili in versione completamente bianca lucida o opaca all'esterno.

Pear

Wall mounted / Sospesi

The distinctive shape of the items in the Pear collection is a feature that defines the entire bathroom space, adding freshness, originality and user friendliness.

The sanitary ware is available in an all glossy white version or matt or two-coloured dark grey exterior.

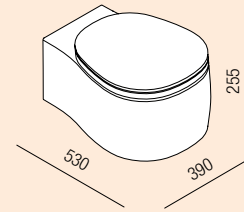

Pear, designed by Patricia Urquiola, becomes more compact in the rimless version while reinterpreting its sinuous shapes.

L'inconfondibile forma degli elementi della collezione Pear, è un segno che caratterizza l'intero ambiente bagno, rendendolo fresco, originale e amichevole.

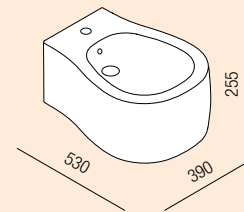

I sanitari sono disponibili in versione tutta bianca lucida o opaca o bicolore con esterno grigio scuro.

Pear, disegnato da Patricia Urquiola, nella versione rimless diviene più compatto reinterpretando le sue forme sinuose.

Drop

Freestanding bathtub / Vasca freestanding

With Drop we took on the difficult task of designing a bathtub that can be used simultaneously in different positions by more than one person. Available in white or two coloured, Drop adds to the production of Agape bathtubs made of Cristalplant® biobased, a material ideally suited to responding to Drop's requirements. Completing the design project is a washbasin designed to sit on a shelf and a freestanding pedestal version.

Con Drop ci siamo avventurati nel non facile obiettivo di realizzare una vasca che possa essere utilizzata contemporaneamente, in diverse posture, da più persone. Disponibile bianca o bicolore, va ad arricchire la produzione di vasche Agape realizzate in Cristalplant® biobased, materiale dalle caratteristiche complessive perfettamente aderenti alla tipologia funzionale di Drop. Il progetto è completato da un lavabo per appoggio su piano e da una versione a colonna freestanding.

AVAS1097_

design Benedini Associati, 2014

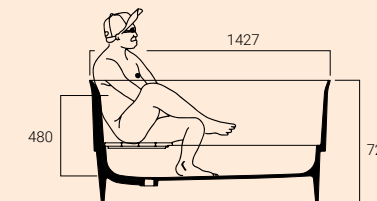

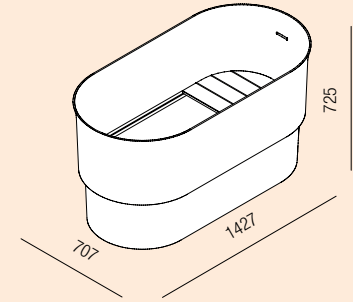

Immersion

Freestanding bathtub / Vasca freestanding

The Immersion bathtub, inspired by traditional timber bathing vessels used in Japan and China, is deeper than a standard tub and occupies a smaller footprint. Similar to an onsen hot spring experience, it offers two posture of bathing: one more upright rather than reclined thanks to a seat realised in iroko wood positioned along one of the side; while the added depth allows a full immersion of the entire body for deep relaxation. The bathtub is made in white Cristalplant® biobased or two coloured. The bathtub can be combined with the sink of the same name.

Immersion reinterpreta le tradizionali tinozze di legno orientali ed è più profonda di una normale vasca occupando una superficie inferiore. La postura più eretta adottata all'interno della vasca ricorda l'esperienza delle stazioni termali onsen. La vasca permette due differenti posizioni, una più sollevata grazie ad una seduta in legno iroko posizionata su uno dei lati, l'altra completamente immersi favorendo la sensazione di relax. La vasca è realizzata in Cristalplant® biobased bianco o bicolore. La vasca può essere abbinata all'omonimo lavabo.

Lariana

Freestanding bathtub / Vasca freestanding

Lariana is a compact bathtub of reduced dimensions. This feature, combined with double wrapping, gives lightness to the solid structure and accentuates the linear form of this modern product. The bathtub is made of white Cristalplant® or in two-tone with light or dark grey exterior and can be matched with the washbasin in the same finishes.

Lariana è una vasca compatta, di misura ridotta. Questa caratteristica, unita al doppio involucro di cui è composta, conferisce leggerezza alla solida struttura ed accentua la forma lineare e moderna del prodotto. La vasca è realizzata in Cristalplant® bianco o bicolore con esterno grigio chiaro o grigio scuro ed abbinabile al lavabo nelle medesime finiture.

Neb

Freestanding bathtub / Vasca freestanding

The Neb bathtub, with its asymmetric shape, flat bottom and slimline sides, has incorporated the recent developments in the use of Cristalplant® biobased. Ultra-light and easy to install, the bathtub is available in white or a two-colour finish in light grey or dark grey. The bathtub can be combined with the sink of the same name.

La vasca Neb con la sua forma asimmetrica, il suo fondo piatto e i suoi bordi dallo spessore ridottissimo, fa suoi i più recenti sviluppi nel campo della lavorazione del Cristalplant® biobased. Estremamente leggera e facile da installare, la vasca è disponibile bianco o bicolore grigio chiaro o scuro. Abbinabile al lavabo disponibile nelle medesime finiture.

Normal

Freestanding bathtub / Vasca freestanding

The immense pleasure of immersing oneself takes on a new dimension with Normal. This model, made in white Cristalplant® biobased or in two-coloured finish in light grey or dark grey, retains the cosy and welcoming form that characterises the entire collection, but in a more compact size and with a more rounded profile at the base.

This means that it fits easily into a wider variety of environments, saving space without in any way detracting from aesthetic appearance or well-being.

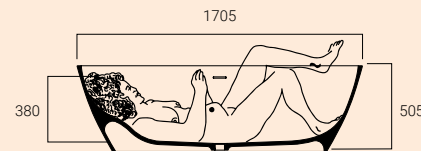

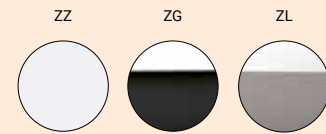

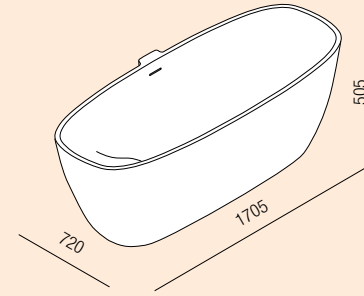

The bathtub can be combined with the sink of the same name.

Il profondo piacere di immergersi entra in una nuova dimensione con Normal. Questo modello, realizzato in Cristalplant® biobased bianco o bicolore grigio chiaro o grigio scuro, mantiene una forma avvolgente e accogliente caratteristica dell'intera collezione, con dimensioni più ridotte e con un profilo più arrotondato alla base.

Questo consente una facile collocazione negli ambienti più diversi, risparmiando spazio senza nulla togliere all'estetica ed al benessere.

Abbinabile al lavabo disponibile nelle medesime finiture.

Ottocento

Freestanding bathtub / Vasca freestanding

Cristalplant® biobased bathtub, a modern composite material, with a soft and silky touch that contains the warmth of the water. The bathtub follows the classic lines based on the design of the old-fashioned, cast iron bathtub, supported on four feet; these feet are in the same material as the bathtub. Also available in version with outside painted in dark grey or light grey. Exposed drainpipe and overflow system. The bathtub can be combined with the sink of the same name.

Vasca in Cristalplant® biobased, un materiale composito morbido e setoso al tatto che mantiene il calore dell'acqua. La vasca segue le linee classiche che riprendono il concetto della vasca in ghisa sorretta da quattro piedi; questi sono realizzati nello stesso materiale della vasca. Possibile anche la variante con esterno verniciato in grigio scuro o grigio chiaro. Scarico e circuito del troppo pieno a vista. Abbinabile al lavabo disponibile nelle medesime finiture.

Ottocento

Built-in bathtub / Vasca ad incasso

A bathtub inspired by the forms of the past, interpreted in the light of an essential and actual aesthetics. Contrary to the old bathtubs in cast iron, Ottocento is made of Cristalplant® biobased, a modern composite material, with a soft and silky touch that contains the warmth of the water. The unmistakable profile of this built-in Ottocento bathtub becomes an integral part of the architecture in this bathroom.

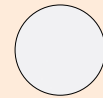

Una vasca ispirata alle linee di un passato remoto, interpretata alla luce di un'estetica essenziale ed attuale; diversamente dalle antiche vasche in ghisa, Ottocento è realizzata in Cristalplant® biobased un moderno materiale composito morbido e setoso al tatto che mantiene il calore dell'acqua. La linea inconfondibile della vasca Ottocento diventa parte integrante dell'architettura del bagno, nella versione a incasso.

Spoon M

Freestanding bathtub / Vasca freestanding

Spoon M is one of the latest stations in a more than twenty year long evolution of the Agape bathtub through form, matter and size, tirelessly iterating and refining the underlying concepts over and over again. The new bathtub refines the formal, dimensional and material qualities of the iconic Spoon, on sale since 1998. More sophisticated geometries, thinner edges marry a more frugal use of materials, fully exploiting the latest advances in manufacturing technologies. Spoon M is made in Cristalplant® biobased and it is available in white or two-tone versions in light or dark grey.

Spoon M è una delle tappe più recenti di una ricerca che dura da oltre 20 anni e attraversa forma, materia e dimensione in un percorso evolutivo della vasca Agape che, con instancabile meticolosità, procede volentieri per iterazioni successive. La nuova vasca affina le qualità formali, dimensionali e materiali dell'icona Spoon, a listino dal 1998. Geometrie più sofisticate, spessori più sottili si sposano con un uso parsimonioso del materiale approfittando delle potenzialità offerte dai nuovi metodi di produzione. Spoon M è realizzata in Cristalplant® biobased ed è disponibile bianca o bicolore con esterno grigio chiaro o grigio scuro.

Vieques

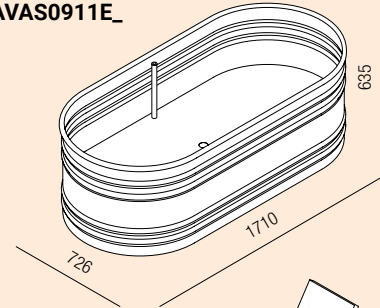

Freestanding bathtub / Vasca freestanding

In 2008, the wellness oasis on Vieques Island where Patricia Urquiola designed the interiors for the W Hotel, offered the inspiration for the creation of the Vieques bathtub. A ready-made tribute to the bathtub of yesteryear that has become a classic of contemporary design. Made of steel, painted in white or with a dark grey or light grey exterior, it can be completed with an iroko shelf and backrest. The stainless steel version now also allows outdoor use, in combination with the washbasin of the same name.

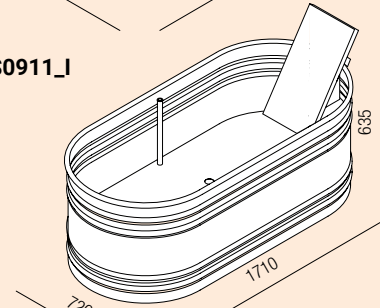

Nel 2008 l'oasi di benessere a Vieques Island dove Patricia Urquiola firma gli interiors per il W Hotel, offre lo spunto per la realizzazione della vasca Vieques. Un omaggio ready made alla vasca da bagno d'altri tempi divenuta un classico del design contemporaneo. Realizzata in acciaio, verniciata in bianco o con esterno grigio scuro o grigio chiaro, può essere completata da una mensola e da un poggiaschiena in iroko. La versione in acciaio inox ne permette ora anche l'utilizzo outdoor, in combinazione all'omonimo lavabo.

Flat D

Showers / Docce

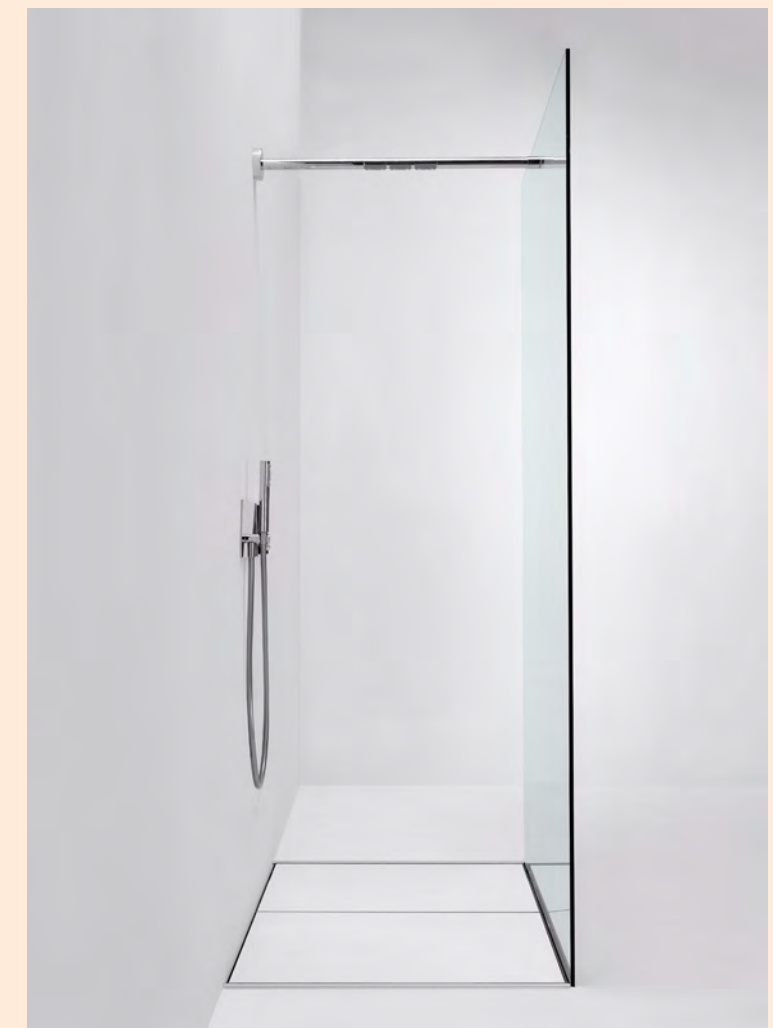

With the Flat D program, the shower is reduced to its essence in a play of layers that hints to volumes of crystalline precision. Thanks to the use of 8 mm glass, the impact of the support structures becomes minimal. The exclusive integration of the shower heads in the support bars and the possibility of recessing the guides and plates, further contribute to the reduction of the elements of the shower which can thus boast a great aesthetic and functional versatility.

The crystals are available in transparent, acid-etched, extra-clear or fumé finishes while the structural elements are in polished stainless steel or chromed brass. The openings can be hinged, sliding or with free access.

Con il programma Flat D la doccia si riduce alla sua essenza in un gioco di piani che alludono a volumi di precisione cristallina. Grazie all'utilizzo di cristalli da 8 mm di spessore per le lastre l'ingombro delle strutture di supporto diventa minimo. L'esclusiva integrazione dei soffioni nelle barre portanti e la possibilità dell'incasso delle guide e dei piatti, contribuiscono ulteriormente alla riduzione degli elementi della doccia che può così vantare una grande versatilità estetica e funzionale.

I cristalli sono disponibili nelle finiture trasparente, acidato, extrachiaro o fumé mentre gli elementi strutturali sono in acciaio inox lucido o ottone cromato. Le aperture possono essere a battente, scorrevoli o con accesso libero.

Flat DX

Showers / Docce

The Flat DX program combines the lightness and clean lines of Flat D showers with great ease of installation that does not require masonry work. The 8 mm glass panels are supported by vertical profiles to be fixed to the masonry, without the need for recessing. The exclusive integration of the shower heads in the support bars and the ability to position them freely along the entire length of the glass further contribute to the reduction of the elements of the shower which can thus boast great aesthetic and functional versatility.

The crystals are available in transparent, acid-etched, extra-clear or smoked finishes while the structural elements are in polished stainless steel or chromed brass. The openings can be hinged or with free access.

Il programma Flat DX unisce la leggerezza e la pulizia delle docce Flat D ad una grande facilità di installazione che non necessita di opere murarie. Le pareti in cristallo da 8 mm sono sostenute da profili verticali da fissare alla muratura, senza bisogno di incasso. L'esclusiva integrazione dei soffioni nelle barre portanti e la possibilità di posizionare le stesse liberamente su tutta la lunghezza del vetro contribuiscono ulteriormente alla riduzione degli elementi della doccia che può così vantare una grande versatilità estetica e funzionale.

I cristalli sono disponibili nelle finiture trasparente, acidato, extrachiaro o fumé mentre gli elementi strutturali sono in acciaio inox lucido o ottone cromato. Le aperture possono essere a battente o con accesso libero.

Plan-a

Showers / Docce

The Plan-a program reflects the long architectural tradition of the frame in the contemporary shower. A sophisticated dialogue between closures with ephemeral transparency and the almost inexorable precision of the aluminum structural elements breaks up the volume in a continuous cross-reference between elements. The structure reduced to its essence in its positioning and in its fine details acts as a discreet frame and an ideal perimeter for your daily rituals.

Plan-a is a system of walls for showers in extra-clear or smoked glass, supported by elements in natural or black brushed anodized aluminum. All the walls are designed to be installed on the floor or any type of shower tray.

Il programma Plan-a declina nella doccia contemporanea la lunga tradizione architettonica della cornice. Un sofisticato dialogo tra chiusure dalla trasparenza effimera la precisione quasi inesorabile degli elementi strutturali in alluminio scompone il volume in un continuo rimando tra elementi. La struttura ridotta alla sua essenza nel suo posizionamento e nei suoi fini dettagli fa da cornice discreta e perimetro ideale per i vostri rituali quotidiani.

Plan-a è un sistema di pareti per docce in cristallo trasparente extrachiaro o fumè, sostenute da elementi in alluminio anodizzato spazzolato naturale o nero. Tutte le pareti sono predisposte per essere installate su pavimento o qualsiasi tipo di piatto doccia.

Amuleto

Shower tray / Piatto doccia

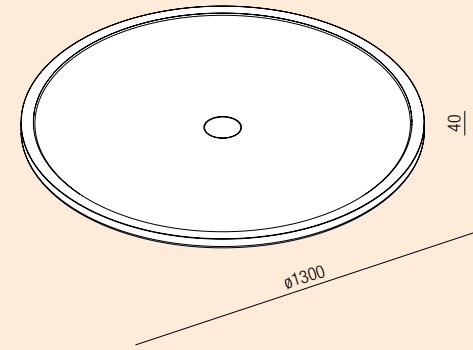

Amuleto is a statement, an object that comes from elsewhere. Amuleto declares the apparent simplicity of his geometry but on closer inspection, it let's you discover its fine details and its delicate curves. Its ample, almost irreverent radius accentuates its two-dimensionality while the Petit Granit opens up unexpected depths in which to lose the gaze. With his absolute gesture, Amuleto transcends the scale of the object for an intense dialogue with the space that embraces it. Both inside and outside.

Amuleto is a round shower tray made of Petit Granit marble. The product includes the waste trap with a chromed ABS drain cover plate.

Amuleto è un gesto plateale, un oggetto arrivato da altrove. Amuleto enuncia l'apparente semplicità della sua geometria ma all'avvicinarsi, lascia lo spazio alla scoperta di dettagli fini e di sezioni dalle curve delicate. Il suo ampio, quasi irriverente raggio accentua la sua bidimensionalità mentre il Petit Granit schiude inaspettate profondità in cui perdere lo sguardo. Con il suo gesto assoluto, Amuleto trascende la scala dell'oggetto per un dialogo intenso con lo spazio che lo accoglie sia all'interno che all'esterno.

Amuleto è un piatto doccia tondo realizzato in marmo Petit Granit. È compreso di sifone con piastra di copertura dello scarico in ABS cromato.

Cooper

Showers / Docce

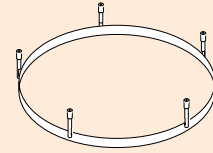

A stainless steel rail suspended from the ceiling using a special support, and a sliding curtain, together create an intimate, ethereal atmosphere: this is the simple yet infinitely versatile concept of Cooper.

Its flexibility enables Cooper to create any configuration: an open or closed ring, large or small, making the best use of the available space and personalising the room in which it is installed.

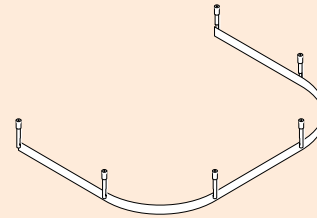

Un nastro di acciaio inox, appeso al soffitto con appositi supporti e una tenda scorrevole creano un'atmosfera intima e leggera: questo è il concetto semplice, ma allo stesso tempo infinitamente versatile, di Cooper.

Grazie alla sua flessibilità, Cooper consente di creare qualsiasi configurazione, ad anello oppure aperta, grande o piccola, utilizzando al meglio lo spazio disponibile e personalizzando l'ambiente in cui è collocato.

Dot Line

Accessories / Accessori

Accessories made of tubular bar in aluminium consisting of brackets (dot) supporting a bar (line) with brushed black anodized finish or with natural, brown or dark oak veneer. In addition to each single item it is possible to obtain a continuous bar that performs the various functions. Both the individual items and the continuous bar can be fitted with shelves, hooks or glasses in aluminium freely positionable along its entire length.

Accessori realizzati con tubolare in alluminio formati da supporti (dot) che sorreggono una barra (line) con finitura anodizzata spazzolata nera o con rivestimento in rovere naturale, bruno o scuro. Oltre agli articoli singoli è possibile avere una barra continua che svolge le varie funzioni. Sia gli articoli singoli che la barra continua possono essere accessoriati con mensole, ganci o bicchieri in alluminio posizionabili liberamente su tutta la lunghezza.

Mach 2

Accessories / Accessori

Mach 2 takes a look at the original Mach series from a fresh perspective. The new project is the result of a detailed analysis of all the elements in the original collection based on user experience and feedback. The programme, with a bold technical look, is made of polished or satin-finish stainless steel AISI 304 with polished edges, or coated in matt black, making it suitable also for outdoor spaces. In keeping with the professional spirit of the original collection, Mach 2 introduces a series of practical new elements which comply with the stringent requirements for use in public spaces, but also make this product family extremely versatile and suitable for the most exclusive domestic bathrooms.

Mach 2 rivisita la serie Mach originale da una nuova prospettiva. Il nuovo progetto è il risultato di un'analisi dettagliata di ogni elemento della collezione originale in funzione dell'esperienza e dell'utilizzo da parte degli utenti. Il programma, dall'estetica sincera e dal segno tecnico, è realizzato in acciaio inox AISI 304 lucido, satinato con bordi lucidi, oppure verniciato in nero opaco, rendendolo adatto anche per l'utilizzo in ambienti esterni. In linea con lo spirito professionale della collezione originale, Mach 2 introduce una serie di nuovi elementi funzionali che, pur rispettando gli stringenti requisiti derivanti dall'utilizzo in ambienti pubblici, rendono questa famiglia di prodotti estremamente versatile e adatta anche agli ambienti domestici più esclusivi.

**Heating elements / Elementi riscaldanti**

The warmth of a body. The warmth of a hug in the naked intimacy of the bathroom. Probably there is no other space in the domestic landscape where having the right temperature becomes such an important component of the overall experience. Our range of heating elements offers timeless and iconic solutions perfectly at their ease in the most different contexts thanks to their versatility and modularity.

Il calore del corpo. Il calore di un abbraccio nella nuda intimità della sala da bagno. Probabilmente non non ci sono altri spazi nell'universo domestico dove la temperatura sia una componente così fondamentale dell'esperienza. La nostra gamma di elementi riscaldanti offre soluzioni iconiche e senza tempo che sono perfettamente al loro agio nei contesti più diversi, grazie alla loro versatilità e modularità.

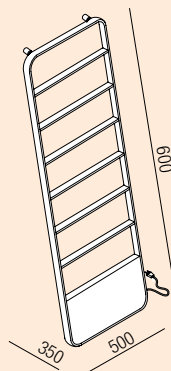

Memory

Heated towel rack / Scalda salviette

A self-regulating, heated towel rack made in stainless steel that inherits its timeless delicate lines from the other elements of the Memory collection to which it belongs. Available in polished chrome finish or painted white or black, it can be freely positioned leaning against the wall. The item requires a 230 V AC power outlet and it is not available for the US market.

Scalda salviette autoregolante realizzato in acciaio inox che eredita le sue delicate linee fuori dal tempo dalla collezione Memory a cui appartiene. Disponibile in versione cromata oppure verniciata bianco o nero, l'elemento può essere posizionato liberamente in appoggio alla parete. L'articolo richiede una presa da 230 V AC e non è disponibile per il mercato USA.

Ascension

Multifunctional seat / Seduta multifunzione

A handy accessory made of solid iroko wood with visible joints on the sides. A single object that, thanks to its versatility, offers two different functions depending on its position. Horizontally, it acts as a small step for the Immersion bathtub, while, if placed vertically, it doubles as a handy side table or storage area.

Comodo accessorio realizzato in massello di iroko con incastri a vista sui lati. Un solo oggetto che, grazie alla sua versatilità, regala due differenti funzioni a seconda della posizione. Posto in orizzontale, funge da scaletta per la vasca Immersion mentre in piedi si trasforma in un comodo tavolino o portaoggetti.

 AVAS1983I

design Neri&Hu, 2018

Ascension

Multifunctional seat / Seduta multifunzione

**Basket, Midi Basket**

Containers / Contenitori

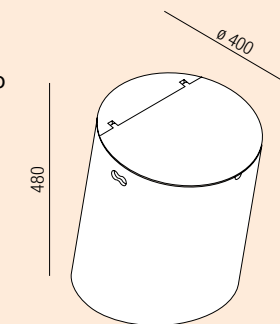

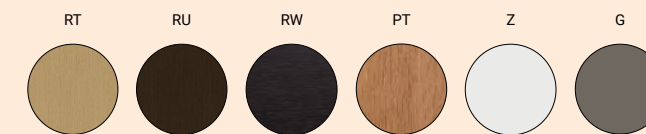

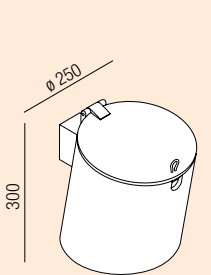

Roomy, cylindrical-shaped containers available in two sizes. Made of curved plywood and available in a natural, brown or dark oak finish or in reconstituted wood, teak finish or in white or grey.

The Basket container is a laundry storage unit that can also be used as a seat. Holes in the sides make it easy to move it. Midi Basket is a comfy waste paper for the bathroom.

Contenitori di forma cilindrica disponibili in due diverse dimensioni. Realizzati in multistrato curvato, disponibili con finitura in rovere naturale, bruno o scuro o in legno precomposto in finitura teak oppure nei colori bianco o grigio.

Basket è un portabiancheria utilizzabile anche come seduta. I fori sui lati permettono di spostarlo agevolmente.

Midi Basket è un comodo gettacarta per la stanza da bagno.

Constellation

Extras / Complementi

Programme for bathroom storage accessories consisting of mirrors and containers with or without lids. Made of white Carrara or black Marquina marble. The post-modern shapes of the collection emphasise the sculptural aspect of smooth marble as if sculpted by water. The lids and details are in natural brushed brass.

Programma di complementi da appoggio per il bagno composto da specchi e da contenitori con o senza coperchio. Realizzato in marmo bianco di Carrara o nero Marquina. Le geometrie post-moderne della collezione enfatizzano l'aspetto scultoreo del marmo levigato come se fosse plasmato dall'acqua. I coperchi e i dettagli che caratterizzano gli oggetti sono realizzati in ottone naturale spazzolato.

Gemma

Extras / Complementi

Gemma is a program of bathroom complements consisting of containers with or without lid, trays and a small table. The trays/lids are made of stainless steel with satin or brushed burnished finish. The cylindrical containers in curved multi-layer birch plywood are clad with natural, brown or dark oak, or opaque lacquered white or grey. The top of the small table is also available with opaque white lacquered edge.

Gemma è un programma di complementi per il bagno composto da contenitori con o senza coperchio, vassoi e tavolino. I vassoi/coperchi sono realizzati in acciaio inox con finitura satinata o brunito spazzolato. I contenitori cilindrici in multistrato di betulla curvato hanno rivestimento in rovere naturale, bruno o scuro oppure sono laccati opachi in bianco o grigio. Il piano per il tavolino è disponibile anche con fascia esterna laccata in bianco opaco.

Memory

Towel holders / Porta salviette

Free-standing towel holder in stainless steel that inherits its delicate lines from the Memory Collection to which it belongs. Its ben calibrated geometries and timeless lines make it a very versatile object both functionally and aesthetically. The ideal complement to a free-standing bathtub or washbasin, Memory is available with chromed, brushed natural or burnished brass structure, while its base can be ordered in five different finishes between solid surface and marble.

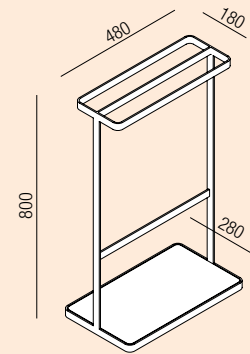

Base finish / Finitura base

Porta salviette da terra in acciaio inox che eredita le sue delicate linee dalla collezione Memory a cui appartiene. Le sue geometrie ben calibrate e le sue linee senza tempo lo rendono un oggetto poliedrico sia dal punto di vista funzionale che da quello estetico. Complemento ideale di una vasca free-standing o di un lavabo a colonna, il porta salviette Memory è disponibile con la struttura cromata, ottone spazzolato naturale o brunito, mentre la base è ordinabile in cinque differenti finiture tra solid surface e marmo.

Fez 2

Taps / Rubinetti

The long-seller Fez has undergone a deep restyling of the internal parts aimed to improve the quality and the certifiability of the product. Thus was born Fez 2 which distinguishes itself externally for redesigned, shorter control handle, manufactured in one piece instead of the three of the original series. From the version for wall mounted or over countertop basins to the floor-mounted version to complete a freestanding washbasin, to the model for bidets. Fez 2 proves equally flexible in the bathtub or shower, with purpose-made sets, all featuring the same unmistakable design. Made in brass with polished chrome finish or painted matt white (RAL9016) or matt black (RAL9005), produced in collaboration with "Rubinetterie Fantini".

La long-seller Fez è stata sottoposta ad una profonda revisione delle parti interne volta a migliorare la qualità e la certificabilità del prodotto. Nasce così Fez 2, che si distingue esternamente per la maniglia di comando, più corta e riprogettata per essere realizzata in un solo pezzo al posto dei tre della serie originale. Dalla versione per lavabi a muro o su piano alla versione a terra per completare un lavabo freestanding, al modello da bidet. Fez 2 rivela la sua flessibilità anche nella vasca da bagno e nello spazio doccia, con gruppi specifici sempre caratterizzati da un inconfondibile design. Realizzata in ottone con finitura cromo lucido o verniciata in bianco opaco (RAL9016) o nero opaco (RAL9005), in collaborazione con "Rubinetterie Fantini".

Limón

Taps / Rubinetti

Meeting and mating with its own circular section, just like in the age-old concept of agricultural grafting, has transformed the seemingly elemental geometries of Limón in something completely different. A new and fresh breed of brass taps that communicate its structure and intended use with unusual honesty and clarity. Limón is available for every functional need in a great variety of finishes, chrome, burnished and brushed, natural brushed brass or matt black-coated.

L'incontro e l'unione con la propria sezione circolare, come nella tradizione dell'innesto agricolo, trasforma le geometrie apparentemente elementari di Limón in qualcosa di completamente diverso. Una nuova e fresca tipologia di rubinetti in ottone che comunica la propria struttura e la destinazione d'uso con inusuale onestà e chiarezza.

Limón è disponibile per ogni esigenza funzionale in una grande varietà di finiture, cromata, brunito spazzolata, ottone naturale spazzolato o verniciata in nero opaco.

Memory Mix

Taps / Rubinetti

Brass taps with different finishes featured by the new lever that takes its shape directly from the iconic cross handle of the Memory series. The new single lever is twice as long as a “conventional” Memory handle arm. Its width has been adjusted and slightly enlarged to be ergonomically consistent with the new usage model.

Rubinetteria in ottone con diverse finiture caratterizzata dalla nuova leva che prende la sua forma direttamente dall'iconica maniglia a croce della serie Memory. La nuova leva singola è lunga il doppio di un braccio dell'impugnatura Memory “convenzionale”. La sua larghezza è stata regolata e leggermente allargata per essere ergonomicamente coerente con il nuovo modello di utilizzo.

Sen

Taps / Rubinetti

Sen, "line" in the Japanese language. A combination of Eastern spirit and Western technology, Sen incorporates multiple functions in a line of independent components which can be freely combined to make a distinct style statement, further enhanced by the striking texture of the black brushed aluminium. The wide selection of taps for washbasin, bathtub, shower and sanitary wares is completed by the accessories of the same range.

Sen, "linea" in giapponese. Sintesi di spirito orientale e tecnologia occidentale, Sen integra molteplici funzioni in una linea di elementi indipendenti, liberamente componibili fortemente caratterizzanti, anche grazie alla matericità dell'alluminio spazzolato nero. La famiglia di rubinetti per lavabo, vasca, doccia e sanitari si completa con gli accessori della medesima gamma.

Square

Taps / Rubinetti

Square is a range that changes the look of tap fittings and enhances them with additional functions, in all types of installation: recessed or surface mounted, for washbasins, bathtubs or showers. Made in polished or satin-finish AISI 316L stainless steel, Square suits every space and situation. Minimal, yet with personality.

Square è un progetto che cambia l'estetica della rubinetteria e la arricchisce di ulteriori funzioni, in tutte le tipologie di installazione: da incasso o esterne, per il lavabo, per la vasca o per la doccia. Realizzata in acciaio inox AISI 316L lucido o satinato, Square si adatta ad ogni spazio e situazione. Minimale ma con personalità.

Square

Freestanding shower / Doccia freestanding

Square changes the look of tap fittings and enhances them with additional functions, in all types of installation: recessed or external, for washbasins, bathtubs or showers. The collection, technically and aesthetically revisited in 2015, is now completed by a freestanding shower. Square is made in AISI 316L stainless steel (polished or satin-finish).

Square è un progetto che cambia l'estetica della rubinetteria e la arricchisce di ulteriori funzioni, in tutte le tipologie di installazione: da incasso o esterne, per il lavabo, per la vasca o per la doccia. La collezione, sottoposta ad una profonda revisione tecnica ed estetica nel 2015, si completa con un soffione da terra per doccia. Square è realizzata in acciaio inox AISI 316L (lucido o satinato).

Mirrors and mirror cabinets / Specchi e specchi contenitori

Agape mirrors are furnishing and architectural components in their own right, ideal for adding light and spaciousness to their surroundings. They often also offer special features for an even clearer view: from integrated lighting to magnifying or doublesided mirrors. Agape offers a wide choice of mirror units: more than just a simple detail in the bathroom.

Gli specchi Agape sono degli autentici elementi d'arredo e d'architettura, ideali per aggiungere luce e spaziosità all'ambiente. Inoltre offrono spesso soluzioni speciali per una visione ancora migliore: dall'illuminazione integrata, agli specchi ingranditori o bifacciali. Agape offre una scelta completa di specchi contenitori: più di un semplice dettaglio nella stanza da bagno.

Eclissi

Mirror / Specchio

Two mirrors and as many reading layers. Two depths and two diameters, 70 and 50 cm, which are compared by proximity and relative position. The soft edges of their luminous halo generate surprising contrasts with the elementary geometry of the reflecting surfaces, defined only by the thin sign of the light that reverberates on the perimeter. 0.6 square meters of reflection in timid overlap. The 50 cm element orbits around the larger mirror to adapt to different functional needs (for example two people with different heights) and aesthetic needs. ASPE038U is certified for US market.

Due specchi e altrettanti piani di lettura. Due profondità e due diametri, cm 70 e 50 che si confrontano per prossimità e posizione relativa. I contorni sfumati del loro alone luminoso generano sorprendenti contrasti con la geometria elementare delle superfici riflettenti, definiti tra loro solo dal sottile segno della luce che riverbera sul perimetro. 0,6 metri quadri di riflessione in timida sovrapposizione. L'elemento da cm 50 orbita attorno allo specchio più grande per adattarsi alle diverse esigenze funzionali (ad esempio due persone con altezze diverse) ed estetiche. L'articolo ASPE038U è certificato per mercato USA.

Revolving Moon

Mirror / Specchio

Revolving Moon is a circular wall mounted mirror with magnifier. The possibility of adjusting the magnifying mirror, mounted on a metal bar, into different positions (either horizontally or vertically) ticks all the boxes for a practical, yet fun and elegant element, creating a formal, yet dramatic effect of a moon orbiting the planet. The mirror, made of black coated MDF, can be installed with the magnifier on either the right or left.

Revolving Moon è uno specchio tondo da parete con ingranditore. Le diverse possibilità di regolazione (in orizzontale e verticale) dello specchio ingranditore montato su barra metallica, permettono di rispondere a tutte le esigenze funzionali in un divertente ed elegante gioco di rimandi formali e cinematografici all'orbita di un satellite attorno al suo pianeta. Lo specchio, realizzato in MDF verniciato nero, può essere installato con l'ingranditore sia a destra che a sinistra.

ASPE039E

design Studiopepe, 2018

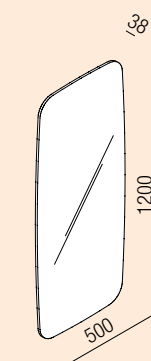

Seppia

Mirror / Specchio

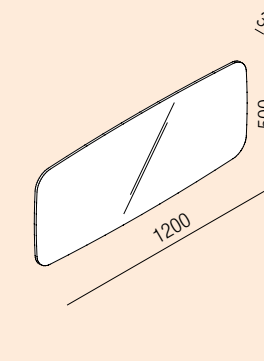

The rounded corners of this design recall the mathematical concept of the superellipse. Halfway between a rectangle and an oval, this mirror by Benedini Associati echoes a shape commonly seen in furniture and car design of the 1960s and 70s, bringing its elegance back to center stage. Seppia's free and ineffable lines avoid harsh geometrical angles, in harmony with the welcoming atmosphere offered by Agape's bathroom design. The mirror can be back-lit with LED lighting and can be positioned horizontally or vertically according to the needs of the space.

Con i suoi angoli smussati, Seppia rimanda al concetto matematico di superellisse. A metà strada fra rettangolo e ovale, lo specchio progettato da Benedini Associati cita una forma che possiamo ritrovare negli arredi e nel car design degli anni '60 e '70 del '900 e ne riprende la purezza. La geometria libera e non definibile in modo univoco di Seppia evita l'eccessivo rigore, in sintonia con l'atmosfera accogliente dell'ambiente bagno di Agape. Lo specchio può essere retroilluminato con luce a LED ed è posizionabile in orizzontale o in verticale, a seconda delle tipologie di spazio.

Solid

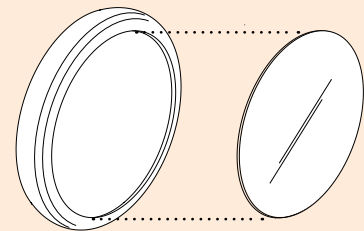

Mirror / Specchio

The Solid mirror recalls a drop of molten metal, but it is made of blown glass: a technique with millennial tradition, combined with the industrial treatment of “metal coating” that makes the frame surface become a mirror when the light is switched off and lets the light pass when it is switched on.

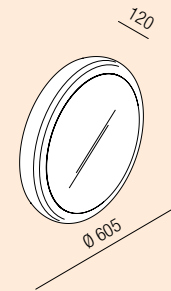

Lo specchio Solid ricorda una goccia di metallo fuso, ma è realizzato in vetro soffiato: una tecnica di millenaria tradizione con in più un trattamento industriale di “metal coating” che rende la superficie della cornice riflettente quando la sorgente luminosa interna è spenta e lasciando attraversare la luce quando è accesa.

Mirror / Specchio

design Diego Vencato, Marco Merendi, 2014

**Solid**

Mirror / Specchio

Working around the idea of a mirror we were fascinated with the concept of giving volume to an object that is usually flat. We imagined it like a drop of liquid metal on the wall, but the idea of a single glass object was both beautiful and difficult to achieve. The three-dimensional volume had to have a function, and so it became the ideal location for the integrated light of the mirror. Then we concentrated on the finishing, one of the key elements of the project. The metal coating process (a technology usually used for industrial parts) made the matter semi-transparent so as to be permeable to light. The result is an almost neo-primitive object, strong and delicate at the same time. The entire volume is in metallized glass. The front has a perfect reflection for the use and the thickness of the side, once you turn the mirror on, it allows light to pass for the ambient lighting.

Lavorando intorno all'idea di uno specchio abbiamo trovato affascinante la possibilità di dare volume ad un oggetto che solitamente è piatto. Lo abbiamo immaginato come una goccia di metallo liquido sulla parete, ma l'idea di fare un oggetto monomaterico in vetro era tanto bella quanto difficile da realizzare. Il volume tridimensionale doveva avere una funzione e così è diventato la sede ideale per l'illuminazione integrata dello specchio.

Ci siamo quindi concentrati sulla finitura, uno degli elementi fondamentali del progetto: il processo di metal coating (tecnologia solitamente usata per pezzi industriali) ha reso semitrasparente la materia in modo da essere permeabile alla luce. Ne è uscito un oggetto quasi neoprimitivo, forte e delicato al contempo. L'intero volume è in vetro metallizzato: la parte frontale ha una riflessione perfetta per l'uso e lo spessore laterale, una volta acceso lo specchio, lascia passare la luce per l'illuminazione d'ambiente.

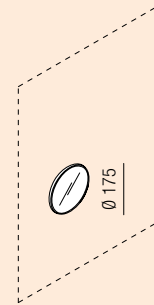

Spai

Mirror / Specchio

This small magnifying mirror with chromed plastic frame has a self-adhesive backing that enables it to be positioned anywhere: for example on top of another mirror, or on any other smooth surface. Magnifying power: 2.

Questo piccolo specchio ingranditore, con cornice in materiale plastico cromato, può essere applicato dovunque grazie alla superficie posteriore adesiva: ad esempio su un altro specchio, oppure su un'altra superficie liscia. Fattore di ingrandimento: 2.

Vitruvio

Mirror / Specchio

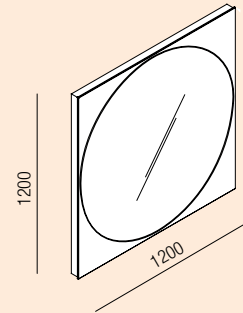

A circle inscribed in a square. García Cumini's new collection of mirrors designed for Agape reinterprets classical style through a contemporary understanding of proportion and beauty. Like in theatre mirrors, an LED light surrounds the reflective surface, creating a clean line that illuminates without casting shadows. Vitruvio is available in three sizes - 60, 80 and 120 cm. They can be freely mix-and-matched, and are perfect for any type of space. A modular concept, suited to many varied and "reflective" compositions.

Un cerchio inscritto in un quadrato. La nuova collezione di specchi progettata da García Cumini per Agape guarda alla classicità in una visione contemporanea della proporzione e della bellezza. Come negli specchi teatrali una luce LED circonda la superficie riflettente e diventa una linea purissima capace di illuminare senza creare ombre. Vitruvio è disponibile in tre dimensioni, da 60, 80 e 120 cm, liberamente combinabili fra loro e adatte a tutti gli spazi. Una concezione modulare aperta a molteplici composizioni di sequenze specchianti.

Lift

Storage units / Contenitori

Lift is a programme of wall mounted and modular storage units for organising and furnishing a room with a range of vertical and horizontal compositions. There is a wide choice of door finishes: wood, marble, brass, leather and mirrored, offering a variety of solutions which are an ideal complement to the Flat XL, Evoluzione and Lato systems. Lift containers can be requested, when ordering, complete with electrified bar on which to attach various types of adapters for connecting electrical appliances.

Lift è un programma di contenitori pensili e modulari che consentono di organizzare e arredare l'ambiente, spaziando in verticale e in orizzontale. Ampia anche la scelta delle finiture delle ante: legno, marmo, cuoio, ottone e specchio, per creare le più diverse soluzioni, in ideale abbinamento con i sistemi Flat XL, Evoluzione e Lato. I contenitori Lift possono essere richiesti, in fase di ordine, completi di barra elettrificata sulla quale agganciare vari tipi di adattatori per il collegamento di apparecchi elettrici.

Materials / Materiali

Quality and continuous research form the basis of the Agape's selection of materials. Our range is constantly evolving to meet the increasingly personalized needs of customers and to guarantee sustainability and meet the refined aesthetic requirements that have always distinguished us.

Highest quality materials from specialized vendors, destined to last over time and to give life to products that overcome fashions and trends and that adapt to the most diverse production processes, from the highest quality industrial realisation to the unique and exclusive craftsmanship of small family run businesses dating back centuries.

Woods in different essences and shades, marbles ranging from the traditional Carrara marble to the more refined Emperador dark and Petit Granit, eco-friendly solid surface and new materials such as Cementoskin®; and again steel, leather, rubber and plastic materials. All united by in-depth research and shared with selected suppliers and with expert craftsmen, all inspired by the same philosophy and with the same purpose: quality and celebration of Made in Italy. A choice that requires commitment, continuous work and long-lasting relationships along the entire supply.

Qualità e ricerca continua sono alla base della scelta dei materiali che Agape propone. La nostra gamma è in continua evoluzione per soddisfare le esigenze sempre più personalizzate dei clienti e per garantire allo stesso tempo i requisiti di sostenibilità e raffinata estetica che da sempre ci contraddistinguono.

Materiali di altissima qualità provenienti da fornitori specializzati, destinati a durare nel tempo e a dare vita a prodotti che superano mode e tendenze e che si adattano ai processi produttivi più diversi, dalla lavorazione industriale di altissima qualità fino all'artigianato unico ed esclusivo di piccole imprese a conduzione familiare risalenti a secoli fa.

Legni in diverse essenze e tonalità, marmi che spaziano dal tradizionale Marmo di Carrara fino ai più raffinati Emperador dark e Petit Granit, solid surface ecosostenibili e materiali inediti come il Cementoskin®; e ancora acciaio, pelle, gomma e materiali plastici. Tutti accomunati da ricerche approfondite e condivise con produttori selezionati o con artigiani esperti, tutti in grado di accompagnare Agape in un percorso comune, ispirati dalla medesima filosofia e con lo stesso fine: qualità e celebrazione del Made in Italy. Una scelta che impone impegno e lavoro continuo ma in grado di creare rapporti di lunga durata lungo tutta la filiera e di realizzare prodotti destinati a distinguersi, talvolta unici.

Wood / Legno

The technological heritage shipbuilding is fundamental for designing wooden bathroom furniture. Gondolas, are made from a combination of eight different types of wood. Aging brings out the wood's natural aesthetic characteristics, and increases its performances. Aesthetically speaking, the most fascinating feature of wood is its changing appearance connected with the passing of time visible through the slowly shifting alterations in its colour and grain. Wood is a natural product and it is possible to notice differences between the samples and the items. These differences should not be considered imperfections, but instead are signs of quality. The use of reconstituted wood as an alternative to solid teak wood helps to preserve our planet's natural resources.

Il patrimonio tecnologico della cantieristica navale è un dato fondamentale nella progettazione di elementi in legno per il bagno. Le gondole, sono il risultato dell'unione di otto diverse essenze di legno. L'invecchiamento esalta le naturali doti estetiche del legno aumentando le sue prestazioni. Esteticamente ciò che più affascina del legno è l'aspetto cangiante legato al passare del tempo misurato attraverso il lento mutare delle venature e del colore. Il legno è un prodotto naturale per cui le diversità riscontrate dai campioni o tra i vari articoli non sono da ritenersi imperfezioni ma, al contrario, indice di qualità. L'utilizzo di legno precomposto in alternativa al legno massello di teak, aiuta a preservare le risorse naturali del nostro pianeta.

Lacquered wood open-pore / Legno laccato a poro aperto

The open pore lacquered wood is a wood subjected to a particular type of varnish that allows to preserve and highlight the natural grain of the wood and the characteristics of the surface. Pores, knots, and veins of the wood panel shine through for a result with a more natural effect that gives visibility to the uniqueness of the wood, whose streaks are always different.

Il legno laccato a poro aperto è un legno sottoposto ad un particolare tipo di verniciatura che permette di conservare e mettere in risalto le venature naturali del legno e le caratteristiche della superficie. Pori, nodi, e venature del pannello di legno traspaiono per un risultato dall'effetto più naturale che dà visibilità all'unicità del legno, le cui striature si presentano sempre diverse.

Cristalplant® biobased

Cristalplant® biobased is an environmentally safe material derived from resinous raw materials of plant origin mixed with natural aggregates of extreme purity. The "soft touch" surface looks like natural stone, which makes it particularly suitable for use in the bathroom. The material has uniform structure throughout and can easily be touched up to restore the original finish.

Cristalplant® biobased è un materiale ecosostenibile derivante da materie prime resinose di origine vegetale miscelate a materiali inerti naturali di estrema purezza. La superficie, con effetto "soft touch" ha un aspetto simile alla pietra naturale che lo rende particolarmente indicato per l'utilizzo nell'ambiente bagno. Il materiale è omogeneo in tutto il suo spessore e può facilmente essere ripristinato.

Solid surface

Compact, non-porous material made from a homogeneous composition of 1/3 acrylic resin and 2/3 aluminium hydroxide, a natural mineral that people use every day because it is an important ingredient of toothpaste. The material is completely non-toxic and recyclable. The surface is homogeneous, silky to the touch, durable and easy to clean. Abrasions can be easily removed by sanding and polishing.

Materiale compatto e non poroso, composto in modo omogeneo da 1/3 di resina acrilica e da 2/3 di idrossido di alluminio, un minerale naturale con il quale molte persone si trovano quotidianamente a contatto, poiché costituisce, ad esempio un componente importante dei dentifrici. Completamente atossico e riciclabile. La superficie si presenta omogenea, setosa al tatto, durevole e facile da pulire. Eventuali abrasioni possono essere facilmente rimosse con semplice levigatura.

Finishings / Finiture

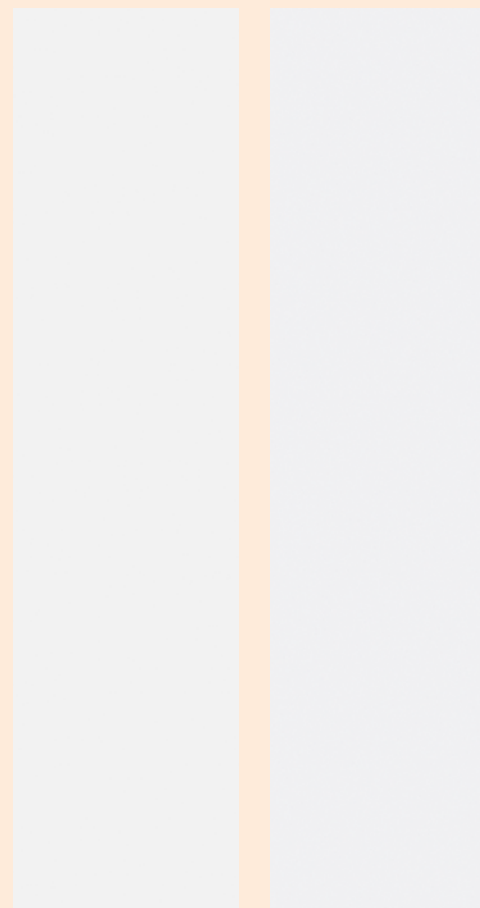

White / Bianco

Ceramilux®

Composite material made with natural mineral content (calcium carbonates and aluminium hydrates) mixed with polyester resins; coated with polyester-based iso-neopentyl gelcoat. Ceramilux® is a non absorbent material, resistant to changes in temperature, scratches and abrasion.

Materiale composito realizzato con cariche minerali naturali (carbonati di calcio e idrati di alluminio) miscelate a resina poliestere; rivestimento con gelcoat a base poliestere isoneopentilica. Ceramilux® è un materiale non assorbente, resistente agli sbalzi di temperatura, ai graffi e all'abrasione.

Matt white / Bianco
opaco

Cementoskin®

Cementoskin® is a new material, a mixture of cement and resin enriched by carefully chosen aggregates.

An "evolved kind of cement", an agglomerate with high technical and structural performance, even when used with very low thickness. It is cast into shape thus the freedom in selecting the geometrics to realize is high, allowing furthermore a high level of detail and wear resistance.

Resistant to any kind of dirt and suitable for outdoor and indoor situations.

Cementoskin® è un materiale nuovo, generato con un impasto di cemento e resina arricchito di inerti accuratamente selezionati.

È un "cemento evoluto", un agglomerato con elevate prestazioni tecniche e strutturali, anche quando usato con spessori molto ridotti.

Viene lavorato per colatura in stampo e questo consente un'ampia libertà nelle geometrie che si possono ottenere, permettendo inoltre un livello molto alto di dettaglio e una elevata resistenza all'usura.

Il materiale è resistente a qualsiasi tipo di sporco ed è adatto sia ad applicazioni indoor che outdoor.

Finishings / Finiture

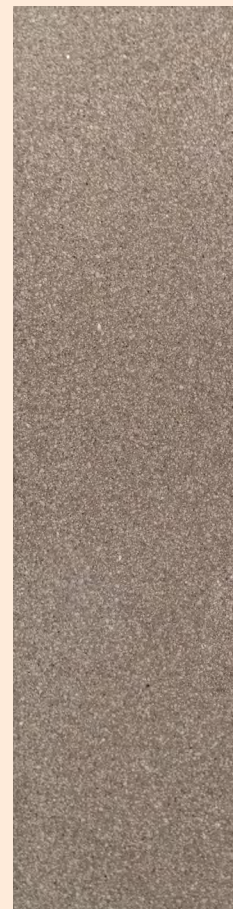

Dark grey / grigio scuro

Light grey / Grigio chiaro

Green / Verde

Coffee / Caffè

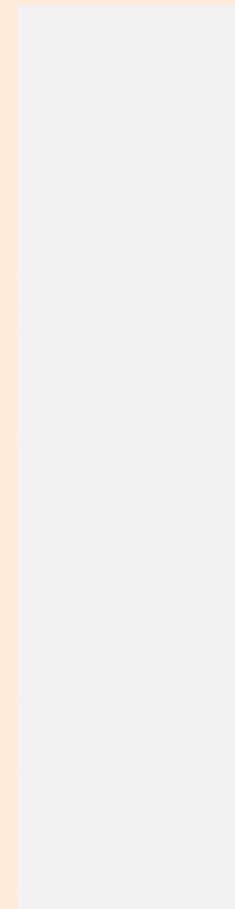

Brick red / Rosso mattone

Ceramic / Ceramica

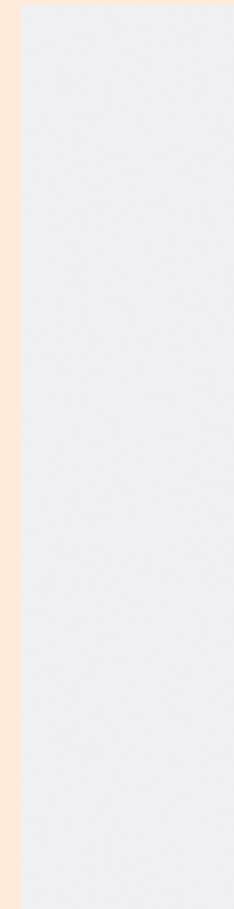

Modelled paste made of clay-based substances with a compact structure, it is hardened with firing processes to ensure surface vitrification with high mechanical and electrical resistance.

Impasto di sostanze argillose a struttura compatta modellato e quindi consolidato mediante processi di cottura che ne garantiscono i processi di vetrificazione della superficie, di notevole resistenza meccanica ed elettrica.

Finishings / Finiture

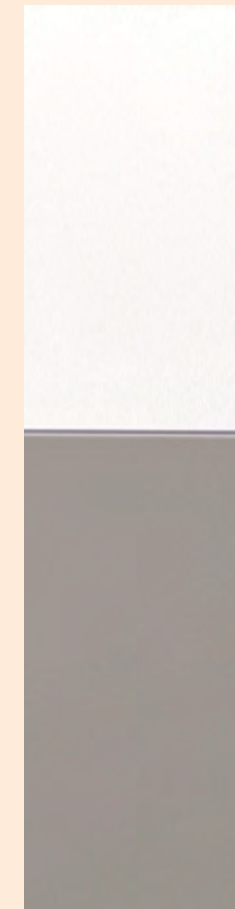

Polished white / Bianco lucido

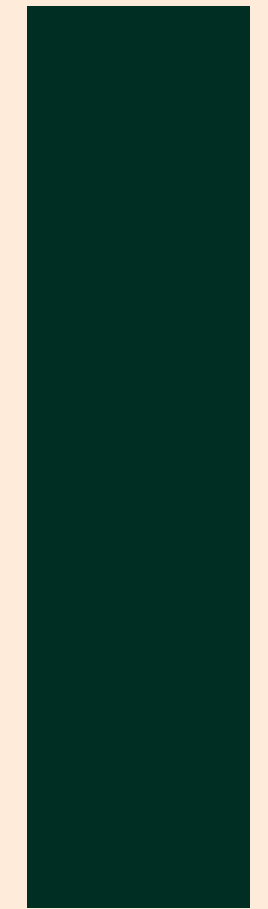

Matt white / Bianco opaco

Polished white - dark grey / Bianco lucido - grigio scuro

Matt white - light grey / Bianco opaco - grigio chiaro

Matt green / Verde opaco

GR - / Grigio scuro opaco

Marble / Marmo

Limestone in compact crystalline state. The term generally refers to all limestone that can be polished. Owing to its strength in compression and ability to withstand high temperatures (up to 650°C), marble is ideal for uses where the material's aesthetic and technical qualities are of paramount importance.

Washbasins are made from either bonded laminated sheets or from carved solid blocks. Marble is a natural product, therefore differences can be noted between samples and various items. These differences should not be considered defects, but instead signs of quality.

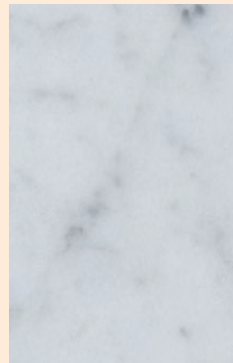

Roccia calcarea cristallizzata e compatta.

In generale comprende qualsiasi pietra calcarea che possa essere lucidata. Il marmo si presta, grazie alla resistenza alla compressione e alle alte temperature (fino a 650 gradi), per realizzazioni in cui le qualità tecniche ed estetiche richieste al materiale sono requisiti fondamentali.

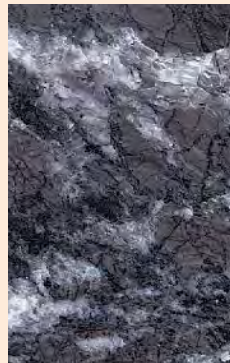

I lavabi sono realizzati con lastre unite tramite incollaggio o scavati direttamente su un blocco.

Il marmo è un prodotto naturale per cui le diversità riscontrate dai campioni o tra i vari articoli non sono da ritenersi imperfezioni ma, al contrario, indice di qualità.

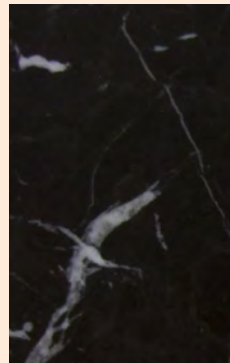

Finishings / Finiture

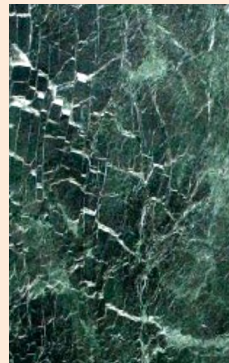

White Carrara marble / Marmo bianco di Carrara

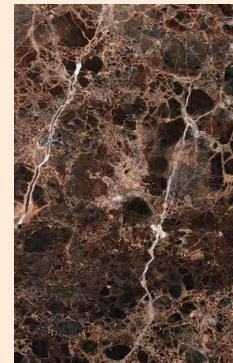

Grey carnica marble / Marmo grigio carnico

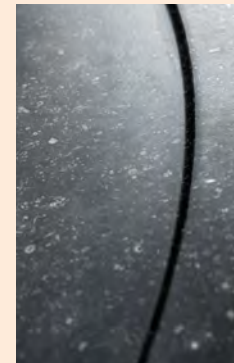

Black Marquina marble / Marmo nero Marquina

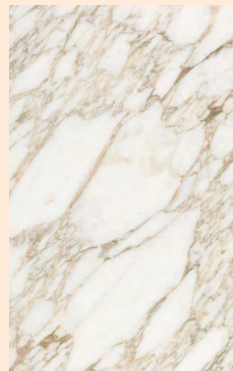

Green Alpi marble / Marmo verde Alpi

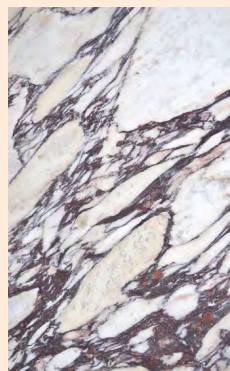

Dark Emperador marble / Marmo Emperador dark

Petit Granit marble / Marmo Petit Granit

Purple Calacatta marble* / Marmo Calacatta Viola*

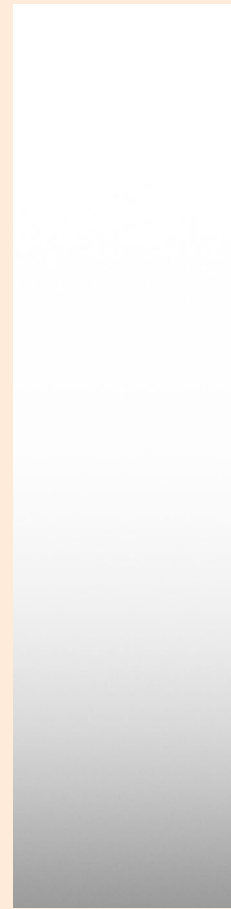

***Marble products can be delivered in Calacatta Vagli, Purple Calacatta or in stone on demand** / I prodotti in marmo possono essere forniti in Calacatta Vagli, Calacatta Viola o pietre o marmi a richiesta del cliente

Stainless steel / Acciaio inox

The term "stainless steel" generally indicates types of high alloy steel containing chromium (generally in quantities ranging from 11% to 30%). Other alloying elements that increase resistance to corrosion are nickel, molybdenum, copper, titanium and niobium. In any case, the overall content of alloying elements in steel must not exceed 50%. The properties of resistance, hardness and elasticity of steel are much higher than those of simple iron. Agape stainless steel products are surface treated to obtain polished or satin finishes.

Il termine acciaio inossidabile (o inox) indica genericamente gli acciai ad alta lega contenenti cromo, generalmente in quantità fra l'11% ed il 30%; altri leganti che aumentano la resistenza alla corrosione sono nichel, molibdeno, rame, titanio e niobio: in ogni caso, perchè si possa parlare propriamente di acciaio, il totale degli elementi leganti non deve superare il 50%. Materiale con doti di resistenza, durezza ed elasticità molto maggiori di quelle del ferro semplice. I prodotti Agape subiscono trattamenti superficiali di lucidatura o di satinatura.

Finishings / Finiture

Polished finish / Lucido

Satin finish / Satinato

Aluminium / Alluminio

Aluminium is a soft, light metal, with a bright silver colour due to the thin oxide layer which quickly forms when it is exposed to the air. It is extremely resistant to atmospheric corrosion and therefore does not require any protective varnish, although it can take a wide range of finishes, from varnish coating to coloured anodising treatments.

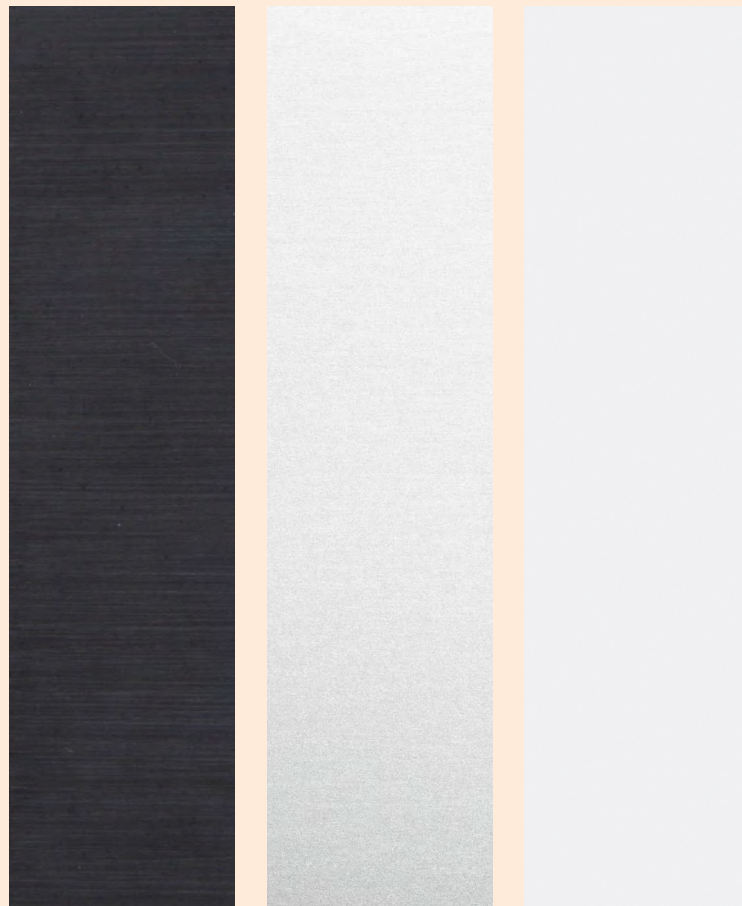

Aluminium is neither magnetic, nor toxic, nor inflammable.

L'alluminio è un metallo morbido e leggero con un colore argenteo vivo, dovuto ad uno strato sottile di ossidazione che si forma rapidamente quando è esposto all'aria.

È estremamente resistente alla corrosione atmosferica: per tale ragione non richiede nessuna verniciatura di protezione, ma può essere ugualmente trattato con un'ampia gamma di rivestimenti, dalle verniciature alle anodizzazioni colorate.

L'alluminio non è magnetico, né tossico, né infiammabile.

Finishings / Finiture

Black brushed anodized / Anodizzato spazzolato nero

Natural brushed anodized / Anodizzato spazzolato naturale

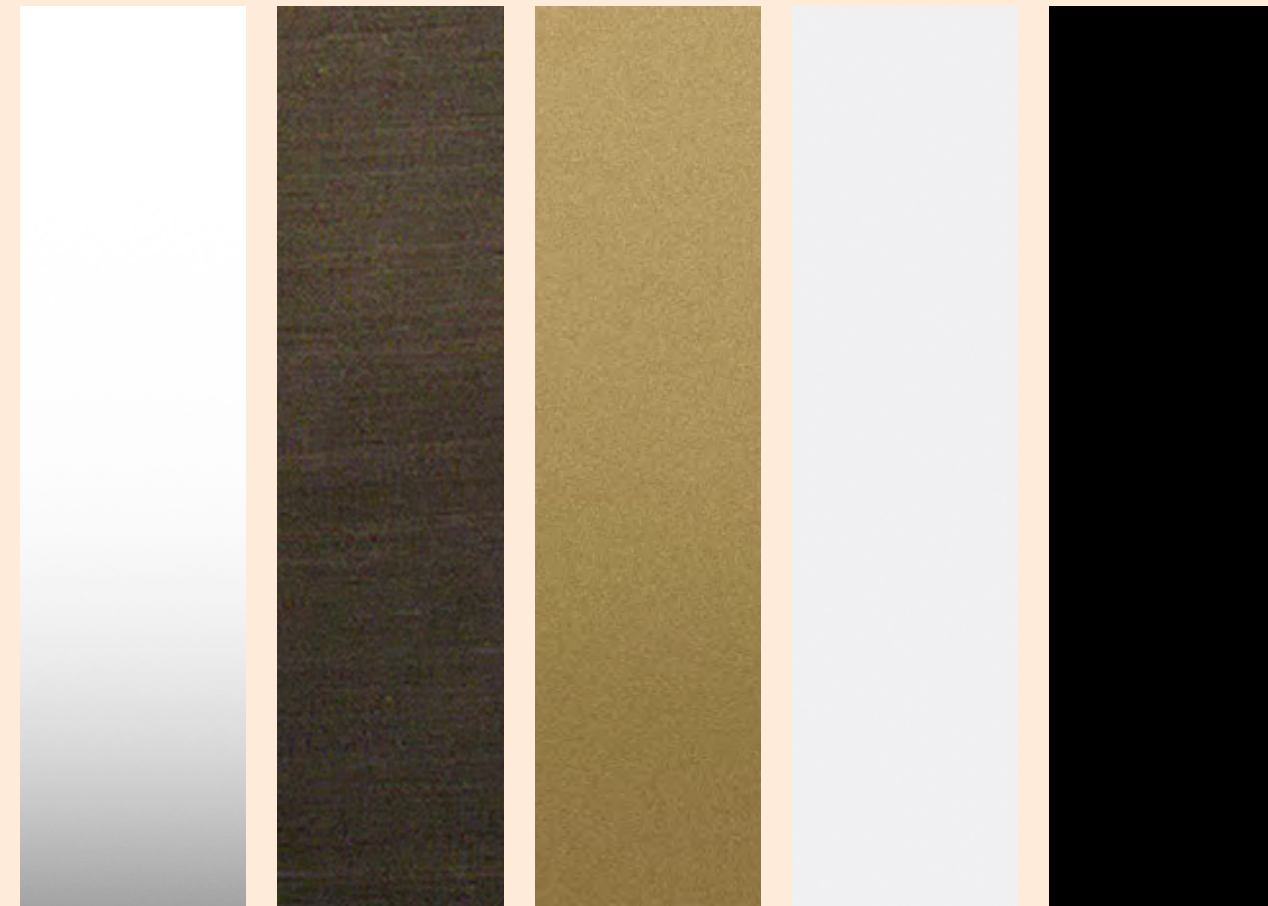

Painted white / Verniciato bianco

Brass / Ottone

The term "brass" designates a copper-zinc alloy, which belongs to the large family of bronze. Its resistance and versatility of applications make it a very useful metal. Agape brass products undergo surface treatments of bright chrome plating, painting or burnishing.

Col nome di ottone si indica una lega di rame e zinco, compresa nella più ampia famiglia del bronzo. È un metallo molto utile, grazie alla sua resistenza e lavorabilità. I prodotti Agape in ottone subiscono trattamenti superficiali di cromatura lucida, di verniciatura o brunitura.

Finishings / Finiture

Chrome / Cromo

Brushed burnished / Brunito spazzolato

Natural burnished / Naturale spazzolato

Painted white / Verniciato bianco

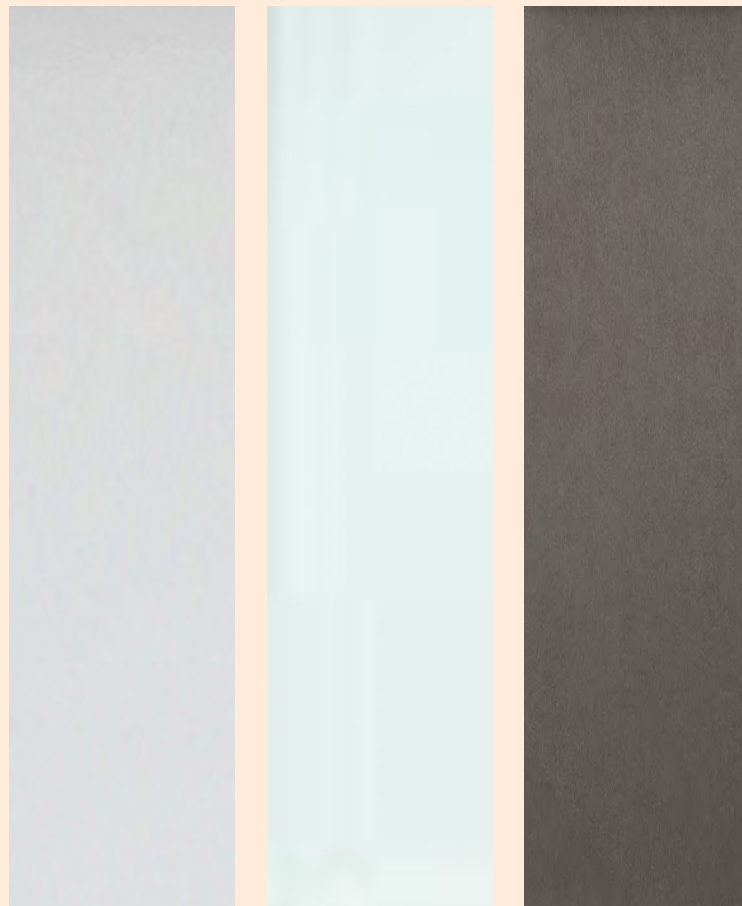

Painted black / Verniciato nero

Crystal glass / Cristallo

Principally composed by silicates, it is obtained by fusing siliceous sand with carbonates. Thanks to its perfect transparency, its inalterable nature and its ability to react to light in multiform ways, crystal glass works well in combination with the other materials that characterise Agape's production range. The joints between the various elements are made with special glue to ensure the perfect transparency and continuity of the material.

Costituito essenzialmente da silicati è ottenuto per fusione di sabbia silicea con ossidi e carbonati. Grazie alla perfetta trasparenza, all'inalterabilità e alla capacità di reagire alla luce in forma mutevole, il cristallo trova particolare applicazione negli accostamenti con gli altri materiali che compongono la produzione Agape. Le giunzioni tra le parti sono realizzate con speciali collanti che garantiscono la perfetta trasparenza e continuità del materiale.

Fumé / Fumé

Silicon rubber / Gomma siliconica

Silicon rubber is a polymer elastomer containing atoms of silicon and oxygen. The composition is stable and irreversible, the mechanical and elastic properties of the material do not undergo change within the temperature range -100 to 250°C. The special characteristics of silicon rubber are its softness, its total non-toxicity (it is even used in mould making for the food industry) and its pure colour. Qualities that make it ideal for applications where the material comes into direct contact with the human body and with water, given its total resistance to oxidation and to solvents. The flexibility allows to remove the limestone that could settle during the use of the item.

La gomma siliconica è un polimero elastomero contenente atomi di silicio e di ossigeno. Il composto è stabile ed irreversibile, le proprietà meccaniche ed elastiche del materiale non subiscono variazioni in intervalli di temperature che possono oscillare da -100 a 250°C. Le caratteristiche peculiari della gomma siliconica sono la morbidezza, la totale atossicità (tanto da essere utilizzata per gli stampi alimentari) e la colorazione pura. Qualità che permettono un'applicazione ideale laddove il materiale entra a contatto diretto con il corpo e con l'acqua data la totale resistenza all'ossidazione ai solventi. La flessibilità permette di rimuovere facilmente il calcare che si deposita durante l'utilizzo del prodotto.

Finishings / Finiture

Orange / Arancio

Dark grey / Grigio
scuro

Grey / Grigio

Leather / Cuoio

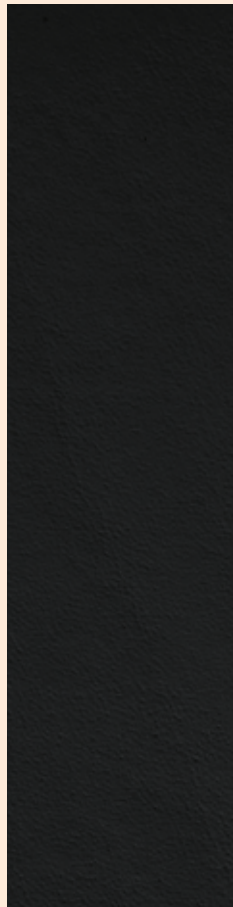

Leather is the material obtained from animal skin which, following a process called 'tanning', is rendered rot-proof. Leather has very high resistance and above all hygienic characteristics which make it particularly suitable for the production of many commonly used products.

Il cuoio è il materiale ricavato dalla pelle degli animali la quale, in seguito a un processo denominato "concia" viene resa imputrescibile. Il cuoio ha caratteristiche di resistenza e soprattutto igieniche molto elevate che lo rendono particolarmente adatto alla produzione di molti manufatti di uso comune.
